Dear Owner,

Congratulations! Thank you for purchasing this new heater manufactured by Marley Engineered Products. You have made a wise investment selecting the highest quality product in the heating industry. Please carefully read the installation and maintenance instructions shown in this manual. You should enjoy years of efficient heating comfort with this product from Marley Engineered Products... the industry’s leader in design, manufacturing, quality, and service.

... The Employees of Marley Engineered Products

**WARNING**

Read Carefully - These instructions are written to help you prevent difficulties that might arise during installation of heaters. Studying the instructions first may save you considerable time and money later. Observe the following procedures, and cut your installation time to a minimum.

CAUTION - TO REDUCE RISK OF FIRE AND ELECTRIC SHOCK:

1. Disconnect all power coming to heater at main service panel before wiring or servicing.
2. All wiring must be in accordance with the National and Local Electrical Codes and the heater must be grounded.
3. Verify the power supply voltage coming to heater matches the ratings printed on the heater nameplate before energizing.
4. This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces.
5. Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock, fire, or damage to the heater.
6. Do not block air intakes or exhaust in any manner. Keep combustible materials, such as crates, drapes, etc., away from heater. Do not install behind doors, furniture, towels, or boxes.
7. A heater has hot and arcing or sparking parts inside. Do not use it in areas where gasoline, paint, or flammable liquids are used or stored.
8. Use this heater only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.
9. This heater is not approved for use in corrosive atmospheres such as marine, green house, or chemical storage areas.
10. Heater must only be installed in a horizontal direction (motor & thermostat to right) as shown in this manual. Do not install sideways or upside down.
11. Heater must be installed with Back Box.
12. For wall mounting only. The following minimum clearances must be maintained: Heater to floor - 4 in. (102 mm); Heater to any adjacent wall - 6 in. (152 mm); Heater to ceiling - 36 in. (915 mm).
13. When wiring, power supply must enter through knockouts in bottom of back box. Do not use the knockouts in left end of back box.
14. Do not operate heater without grille installed.
15. Do not use heater for dry out. Paint, plaster, sawdust, and drywall sanding dust will damage heater and must be kept out of heater.
16. Grille and discharge air are hot when in use. Do not install or use heater in any area where the airflow from heater may be obstructed. Hot air may damage certain fabrics and plastics. Always keep electrical cords, bedding, furniture, and other combustibles away from heater.

SAVE THESE INSTRUCTIONS
The “G” Series heaters are designed for recessed installation in standard 2 x 4 (50mm X 100mm) or larger stud walls with the back box mounted as shown in either Fig. 1, or Fig. 2.

NOTE: Heater should be controlled by either built-in thermostat or remote wall thermostat.

This heater may be wired with standard building wiring (rated minimum 60° C). Refer to Table 3 for appropriate wire size for the heater to be used.

NOTE:

The “IF” models do not include a backbox. The Backbox is ordered separately. In the parts bag for “IF” models, there is a white label that indicates multiple wattage and must be place in the backbox on the bottom right-hand side. When wattage changes, the installer must circle the wattage on the white label before installing the heat deck.

TO INSTALL BACK BOX (Model RBB) IN NEW CONSTRUCTION - WALL STUDS 16” OC.

(REFER TO FIG. 1)

NOTE: Please review warning 12 on page 1.

1. Locate back box (model RBB) and back box support brackets (2). Back box must be installed with mounting rails to the top (see Fig. 1B).
2. Install back box support brackets with foot tabs directed towards the center of the back box as shown in Fig. 1A and 1B. It may be necessary to bend up slightly the tab on the back box support bracket to allow insertion under the mounting lances on the bottom of the back box.
3. Determine which knockout in back box will be used for field wiring and remove (see back box drawing pg.1). Install strain relief (field supplied). See warning No. 13.
4. Fish field wiring through strain relief leaving 6" of wire inside box.
5. Insert back box assembly into wall. The front of the back box should be flush with the finished wall surface or it may protrude slightly. The back box should never be recessed into the wall. (see Fig. 2). The back box support brackets should be resting on the sole plate of the stud wall to insure proper spacing and leveling (see Fig. 2B).
6. Use two (2) wood screws or drywall screws or two (2) nails (field supplied) to secure the side of the back box that adjoins a stud. Use one (1) wood screw or drywall screw or one (1) nail (field supplied) to secure the foot tab of the back box support bracket (that is on the end opposite the stud) to the sole plate (see Fig. 2B).

TO INSTALL BACK BOX IN EXISTING CONSTRUCTION

NOTE: Please review warning 12 on page 1.

1. Locate wall studs to be sure that entire cut-out can be made between studs. At least one side of the cut-out must be flush with side of the stud. Bottom of cut-out must be 4" above finished floor minimum. Make a cut-out in wall 14-1/2" wide X 6-3/4" high (368mm X 171mm) (see Fig. 3).
2. Determine which knockout in back box will be used for field wiring and remove (see back box drawing, pg.1). Install strain relief (field supplied).
3. Fish field wiring through strain relief leaving 6" of wire inside box.
4. Insert back box into cut-out. The front of the back box should be flush with the finished wall surface or it may protrude slightly. The back box should never be recessed into the wall. (see Fig. 1C or 2C).
5. Using four (4) wood screws or drywall screws (field supplied) or four (4) nails (field supplied), secure back box to studs (see Fig. 1B). If wall studs are greater than 16" oc., use only 2 fasteners and on the opposite end of the back box drive a 1" sheet metal screw (provided) through hole in end cap. This will draw the back box tight with drywall when grille is installed. (See Fig. 4.)

TO INSTALL FAN DECK ASSEMBLY

NOTE: Fan deck assembly should not be installed until after the drywall phase of construction is complete. Dust from drywall installation and joint compound can be harmful if it gets inside fan deck components.

1. Locate fan deck and mounting rails in top of back box.
2. Insert flanges on fan deck into mounting rails and slide back until fan deck stops (see Fig. 7).
3. Referring to Table 1, determine the wiring diagram for the specific model heater shown on heater nameplate. Make wiring connections using appropriate wiring connectors. Connect ground to green colored heater ground wire.
4. Remove 1/2" knockout from grille and install grille using two oval head screws. Push thermostat knob on thermostat shaft.
5. Reconnect power at main fuse or circuit breaker distribution panel.

WARNING

SUPPLY VOLTAGE MUST MATCH HEATER NAMEPLATE VOLTAGE. CONNECTION TO ANY OTHER VOLTAGE COULD CREATE RISK OF FIRE OR PERMANENTLY DAMAGE HEATER.

</tbody>
</table>

Note: *M* Inner Frame models must be used with RBB back box.
For installations over 7500 ft. above sea level we recommend to use heaters with wattages under 1500 watts.
"T2" Models include 2 Pole thermostat.
* Multi-Watt units include "Clip 'n Fit®" feature and RBB back box.

*" These models are shipped for maximum wattage. Refer to Table 2 to obtain lower wattage ratings.

NOTE: See table 1 for proper wire diagram.
MAINTENANCE

TO REDUCE RISK OF FIRE AND ELECTRIC SHOCK, DISCONNECT ALL POWER COMING TO HEATER AT MAIN SERVICE PANEL BEFORE SERVICING OR PERFORMING MAINTENANCE.

TO CLEAN HEATER: The heater should be cleaned at least annually for maximum efficiency or more often if used in dirty environment. Before cleaning be sure power is off and heater is cool. First, remove knob by pulling straight out, then remove front grille and clean blower wheel using a vacuum cleaner with a brush attachment. The grille may be cleaned with a slightly damp rag if desired.

OPERATIONAL NOTICE – RED WARNING LIGHT
Your heater is equipped with an automatic reset limit control that will automatically turn the heater OFF to prevent overheating. Should this occur, the red warning light will illuminate and will continue to shine until the limit resets. Your heater is also equipped with a backup “one shot” thermal protection fuse that will permanently disable the unit, to prevent a fire, if the reset limit fails. If the red warning light illuminates and the heater never restarts, the “one shot” thermal protection fuse has been activated and you should consult the factory.

THE ILLUMINATED RED WARNING LIGHT SIGNIFIES THE HEATER HAS BEEN SUBJECTED TO SOME ABNORMAL CONDITION CAUSING IT TO OVERHEAT. CHECK HEATER TO INSURE THAT IT HAS NOT BEEN BLOCKED IN ANY MANNER (IF SO, REMOVE BLOCKAGE). IF THERE IS NO INDICATION OF BLOCKAGE IT IS RECOMMENDED THE HEATER BE CHECKED BY A REPUTABLE ELECTRICIAN OR REPAIR SERVICE TO INSURE THE HEATER HAS NOT BEEN DAMAGED. DO NOT CONTINUE TO USE HEATER IF LIGHT IS ON.

LIMITED WARRANTY
All products manufactured by Marley Engineered Products are warranted against defects in workmanship and materials for one year from date of installation, except heating elements which are warranted against defects in workmanship and materials for five years from date of installation. This warranty does not apply to damage from accident, misuse, or alteration; nor where the connected voltage is more than 5% above the nameplate voltage; nor to equipment improperly installed or wired or maintained in violation of the product’s installation instructions. All claims for warranty work must be accompanied by proof of the date of installation.

The customer shall be responsible for all costs incurred in the removal or reinstallation of products, including labor costs, and shipping costs incurred to return products to Marley Engineered Products Service Center. Within the limitations of this warranty, inoperative units should be returned to the nearest Marley authorized service center or the Marley Engineered Products Service Center, and we will repair or replace, at our option, at no charge to you with return freight paid by Marley. It is agreed that such repair or replacement is the exclusive remedy available from Marley Engineered Products.

THE ABOVE WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE WHICH EXCEED THE AFORESAID EXPRESSED WARRANTIES ARE HEREBY DISCLAIMED AND EXCLUDED FROM THIS AGREEMENT. MARLEY ENGINEERED PRODUCTS SHALL NOT BE LIABLE FOR CONSEQUENTIAL DAMAGES ARISING WITH RESPECT TO THE PRODUCT, WHETHER BASED UPON NEGLIGENCE, TORT, STRICT LIABILITY, OR CONTRACT.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

For the address of your nearest authorized service center, contact Marley Engineered Products in Bennettsville, SC, at 1-800-642-4328. Merchandise returned to the factory must be accompanied by a return authorization and service identification tag, both available from Marley Engineered Products. When requesting return authorization, include all catalog numbers shown on the products.

HOW TO ORDER REPAIR PARTS
In order to obtain any needed repair or replacement parts, warranty service or technical information, please contact Marley Engineered Products Service Center toll-free by calling 1-800-642-HEAT.

When ordering repair parts, always give the information listed as follows:
1. The Model Number
2. The Part Description
3. Date of Manufacture

Part No. 5200-2385-008

ECR 35915
07/04
