Portable unit with high power output--The Power Cat is several units in one: a high velocity blower that can be used for ventilating and cooling, with a flood light for added convenience (except model 1200XLH). Each is fitted with a duplex electrical receptacle and features a 25 ft., heavy-duty grounded extension cord.

The Power Cat is the essential tool for a variety of tasks. Use it to cool or ventilate a workshop, dry a damp surface, remove harmful fumes from a freshly-painted room, brighten work space underneath a car’s hood, or remove irritating smoke from any area. The Power Cat becomes your most trusted working partner. Wherever there’s an electrical power outlet, that’s where you’ll appreciate The Power Cat. With rugged steel construction, The Power Cat is built to last.

Available with a variety of accessories, the intake and exhaust duct accessories make The Power Cat an ideal workmate for the welder. Harmful, toxic fumes and smoke created during welding are quietly eliminated through the use of these two accessories.
