- Hallways
- Lobbies
- Waiting Rooms

COLORS

- Northern White

DIMENSIONS

- 72-1/2"H x 14-1/8" W x 7" D

CFM

- 300

- Heater draws in cool air at top inlet, forcing air downward via fan over heating element and then quietly discharging warm air thru bottom inlet
- Warm air at floor creates a gentle convective process in room, preventing stratification of warm air near ceiling and ensuring comfort for occupants
- Heater can be surface-mounted or recessed into wall sections (maximum depth of recess is 5-3/8 in.)
- Heavy-duty open coil electric heating elements provides uniform heat and long operating life
- Digital 24V, two-wire electronic thermostat included with heater
- Contemporary styling uses soft curves on all edges, avoiding sharp corners of a square design
- Large wiring compartment is accessible from front of heater enabling rapid, easy hookup
- Optional rear outlet package allows some heated air to adjoining rooms; mounted inside wall behind heater
