350 - 650

Now compatible with SmartSeries Plus when used with 24VAC control transformer!

Introducing the HUHAA PRO series Unit Heaters. Same great HUHAA you rely on everyday but now with added safety and control. The new HUHAA Pro series comes standard with:

- A disconnect switch to make maintenance a safe and easy process.
- A 24VAC transformer for safer control as well as future proofing in case a low voltage digital thermostat is desired in the future.
- A built in single stage thermostat which gives basic control right out of the box.
- PRO-SSP Models come with the SmartSeries Plus ready to be remote mounted, to give you BMS communication via BACnet MS/TP, digital touchscreen, 7 day schedule, temporary override or setback, and cooling mode to run only the fan.

Benefits of the HUHAA PRO:

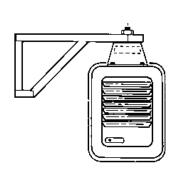

- Safety: The integrated disconnect switch and low voltage transformer add additional safety to the base HUHAA lineup. The disconnect switch gives peace of mind to the maintenance worker because the disconnect switch will cutoff incoming power to the unit so it can be easily repaired. The low voltage transformer no longer requires you to work with line voltage control for easy and safer control.
- Better Lead Times: The HUHAA PRO series heater will be a stock product so they will have the same lead times as the base HUHAA models we have today meaning no long wait for configured units!
- **Better Pricing**: Enjoy the benefits of the three added accessories without the full cost of a similar configured style unit.
- Easy Setup: All of the accessories are installed in the factory so once the product reaches your door it just needs to be wired then set via the built in thermostat and you are good to go.
- Easily Stocked: With all the features and product built as a stock it is easy to keep on the shelves of distributors so you can get the product right when you need it.
