Commercial fans circulate large volumes of air from above the floor to keep occupants, workstations and machinery at comfortable temperatures during both hot and cold weather seasons. Well suited for applications where quiet operation is desired and/or lower ceilings are prevalent.

### **Summer Usage**

- Keep occupants and machinery cooler in hot summer months by running the fan in a clockwise direction to create a mild windchill effect
- Control speed and direction of fan via the unitary control for optimum effect
- Open up floor space by removing the need for multiple fans and cords at user-level and creating a safer work environment for occupants

## Winter Usage

- Heat Destratification effect: Using the reversible control, run fan in counter-clockwise direction to bring warm air down from high ceilings to occupant and machinery level
- Reduces load on overall HVAC system to maintain heat envelope of facility and reducing overall energy and equipment maintenance costs

## CHD SERIES

# Commercial High-Efficiency Ceiling Fan

18 Pole 115V; reversible motor. Permanently sealed double-ball bearing motor.  $\frac{3}{8}$ " x 7  $\frac{1}{4}$ " locking J-hook for installation. White epoxy finish. Steel blades. Provides superior air velocity and efficiency.
