THE MARLEY

Difference

INNOVATION & TECHNOLOGY

Custom design capabilities across product portfolio

First to market with SmartSeries™ controls

Robust control offering featuring connected products

COMPREHENSIVE SUPPORT & SERVICE

In-house customer service, tech services & engineering teams

Manufacturing based in South Carolina, USA

Coast to coast network of sales representatives

Largest distribution network in the industry

CUSTOM SOLUTIONS TEAM

50+ years of custom heating & ventilation design experience

Full tech services & engineering team in house

Supporting you from design to installation & after-sales service

500,000+ sq. ft. manufacturing facility in Bennettsville, SC.

Our American workers build the solutions you can rely on for years to come

360° PROJECT SUPPORT

60+ representative agencies throughout North America

Over 50 years of engineering and technical expertise in heating

Products are designed, engineered & assembled in **Bennettsville, SC**

Comfort Solutions **FOR ALL YOUR SPACES**

FOR FREEZE PROTECTION

Install anywhere heat is needed

Prevent pipes, pumps and other water or fluid-filled equipment from freezing.

Automatic, 24-hour protection

Just set the thermostat and leave it.

Corrosion Protection

Galvanized steel housing and polyester power paint for maximum durability.

WHT500 Series | Utility Well/Pump House Heater

FOR SMALL SPACES

Stay cozy in close quarters

Compact-sized wall heater is ideal for residential or commercial installations.

Efficient and quiet

Smooth-running, multi-layer impeller so you will feel the warmth not hear it.

Fast and easy installation

CLIP-N-FIT® feature easily adjusts to half wattage for ultimate flexibility

COS-E Series | Fan-Forced Wall Heater

FOR PERSONAL SPACES

Deliver personalized warmth

Ideal for offices, workstations, conference rooms or reception areas.

Heat your target, not the air

Radiant heaters deliver focused warmth, just like the sun.

Save on energy costs

Energy-efficient; operates on less than a dollar a week*.

202SL Series | Radiant Plug-In Under Desk Heater

*Cost estimate based on energy cost of 10 cents per kWh in 5-day work week.

FOR RESIDENTIAL SPACES

Stable, gentle heat

Hydronic design with large heat reservoir maintains consistent temperatures for sustained comfort, reducing thermostat cycling.

Fewer allergens in the air

Natural convection airflow — no fans or blowers to circulate dust or allergens.

Easy to install

Low profile and UL-listed for flush wall and floor mounting.

HBB Series | Electric Hydronic Baseboard Heater

THE RIGHT SOLUTION

WHY FAN-FORCED HEAT

Quickest way to comfortably heat a space.

Delayed fan operation **eliminates cold blasts** into the space.

Variety of sizes and outputs for residential to large commercial projects.

WALL HEATERS | CEILING HEATERS | UNIT HEATERS

WHY CONVECTION HEAT

Fan-less airflow **minimizes circulation of dust and allergens.**

No moving parts for **quiet, easy-to-maintain comfort.**

Versatile controls for optimal **localized heating**, flexibility and **energy savings.**

ARCHITECTURAL CONVECTORS | BASEBOARD HEATERS
ARCHITECTURAL TRENCH HEATERS

WHY RADIANT HEAT

Energy efficient. Works like the sun—heats people and objects rather than the air.

Very **low maintenance** with no filters, ignitors or moving parts.

Clean and safe with no fumes, odors or combustion properties.

CEILING PANELS | INFRARED HEATERS | PORTABLE HEATERS

for unique places

MORE THAN HEAT

Need Air Circulation?

EXPLORE OPTIONS IN VENTILATION

Increase energy efficiency up to 30%* by recirculating heat energy and reducing main HVAC system load.

With destratification effect, occupants **stay comfortable longer**.

Reverse fan direction in **summer months** for cooler air.

*Based on an ASHRAE "Saving Heating Costs in Warehouses" study

Need to Heat a Flexible Floorplan?

EXPLORE OPTIONS IN PORTABLE HEATERS

Sleek, **compact design** for effortless placement anywhere.

Ready out of the box: All cords and mounting included for easy installation.

Built in controls and **safety limits** for ultimate peace of mind.

Need to Heat Hard-to-Reach Spaces?

EXPLORE OPTIONS IN SPECIALTY HEATERS

Designed for **hard-to-reach** or **remote applications**.

Specially engineered for both **occupant comfort** and/or facility **freeze protection**.

Rugged, durable construction ideal for **long-lasting heat**.

Need to Heat a Dangerous Environment?

EXPLORE OPTIONS IN HAZARDOUS HEATERS

Designed and constructed for the **most demanding environments**.

High quality, robust materials **built to last**.

Peace of mind with **safe and reliable** heat for any application.

No matter the industry or application, Marley Engineered Products has a robust portfolio of innovative, reliable, high-performance comfort heating and ventilation solutions for all your heating needs.

When it comes to comfort heating, contractors, architects, engineers and HVAC professionals trust Marley, the industry leader, for its residential, commercial and institutional heating solutions.

for safe comfort

Specialized comfort in all the right places even in hard-to-heat spaces

Catalog Guide

SKU Legend:

	Popular Products These products are our most commonly stocked items across channels to serve most applications in market. Usually available from inventory with standard lead times.
	Extended Offering Additional application coverage with features that may be more specific to your needs. Available with longer lead times compared to our standard stocking items.
	Made to Order These items are Made to Order configurations that are manufactured specific to your customization requirements and have longer lead times. Please contact your Marley Sales Representative for further details.

Certification Descriptions

	These products are U.L. listed by Underwriters Laboratories, ensuring that the products have passed Underwriters Laboratories rigorous testing procedures to specific safety standards for electrical products and have assigned the appropriate listing number required for safety standards and electrical codes.
	The CSA mark from the Canadian Safety Association is recognized and accepted throughout Canada and the US at federal, state, provincial, and municipal levels. It means that the product is certified to the applicable Canadian and US safety standards, respectively in Canadian and US markets.
	A product bearing the c ETL us Listed mark signifies that it was tested and meets the minimum requirements of prescribed product safety standards for US and Canada. Moreover, the mark indicates that the manufacturer's production site conforms to a range of compliance measures and is subject to periodic follow-up inspections to verify continued conformance.

Standard Colors*

				
White	Beige	Bronze	Black	Aluminum

*Options vary by product

- Marley Engineered Products reserves the right to change or cancel this policy at any time, at its sole discretion without notice.
- For applications that require a primer coat, a Beige powder coat will be provided as standard color. Consult factory for more information.
- All colors are approximate (as nearly correct as can be produced by modern printing).
- Additional custom colors are available to order. Please contact your local QMark/Berko sales representative for additional details.
- There is a price adder for custom colors.
- To minimize the possibility of error when ordering material painted a custom color, a color chip of the custom color must be included with the order. The chip must be a minimum 3 x 5 in. and be of the same material as the enclosure of the ordered heater (ie. steel or aluminum).

FRC SERIES

Architectural Heavy-Duty Wall Heater

WALL HEATERS

Heavy-duty heat doesn't require that you settle for a boring, basic look. These architectural wall heaters feature a **striking design** while providing the **powerful output** you need to heat any room or open area.

Key Features:

Connect to Control

An optional relay is available to connect this wall heater to your Building Management System, for centralized control of your environment.

Contemporary Look

The bar-stock grille design provides an architectural accent that complements designed spaces like restaurants and entranceways.

Stay in Control

This unit's built-in thermostat features tamper-resistant protection, so only authorized personnel can make adjustments to your building's temperature levels.

Delay Operation

This wall heater has a fan delay feature that waits until the unit warms up to begin blowing air into the room. The fan keeps operating until the unit cools down, so you get maximum heating performance.

Ease of Maintenance

All units include a power on/off switch for added safety during maintenance, as well as a permanently lubricated and enclosed fan motor, creating long life and low maintenance needs.

FRSMPB	685360030388	Surface mounting frame for surface installations. Painted to match heater decor, 3 1/8 in. deep	Bronze	5 lbs
SMFL	685360174433	Surface Mounting Frame	White	5 lbs
SMFL1	685360174440	1 in. Semi-Recessed Frame	White	2 lbs
SMFL2	685360174457	2 in. Semi-Recessed Frame	White	2 lbs
VKFSFCNW	685360074665	14-gauge security front cover	White	6 lbs

Note: *Will accommodate pneumatic/electric or low-voltage controls commonly used with computerized energy management systems
Mounting Limitations: For wall mounting, do not install back box closer than 8 in. from floor or adjacent wall. Do not install heater behind towel rack, behind door, in floor, in closet, in ceiling or where air flow may be obstructed. All controls are concealed behind the front cover making them essentially tamper proof.

Dimensions and Clearances:

FRA SERIES

Commercial Fan-Forced Large Wall Heater

WALL HEATERS

With a durable commercial-grade steel grille, this heater delivers **optimized airflow** to homes, basements, offices, conference rooms, lobbies, hallways and vestibules, for wall-mounted, fan forced comfort **wherever you need it.**

Key Features:

Cool Running

Set this commercial wall heater to fan only mode for added air circulation or to keep things cool during the warmer months.

Delay Operation

This wall heater has a fan delay feature that waits until the unit warms up to begin blowing air into the room. The fan keeps operating until the unit cools down, so you get maximum heating performance.

Set Your Temp

This commercial wall heater features an integrated double-pole thermostat for easy temperature adjustment whenever you need to make a change.

Perpetual Protection

This wall heater features a permanently lubricated fan motor, so it will be ready for long-term operation with little required maintenance.

VFK SERIES

Commercial Fan-Forced Wall Heater

WALL HEATERS

For **wide open spaces** like entryways and vestibules, basements, playrooms and mechanical areas, this unit provides **fast-acting heat**.

Key Features:

High-Capacity Heat

4800 watts of power provide fast-acting, robust heat right where you need it, with no need for venting or exhaust.

Safe Operation

The unit's safety protection will shut the unit off before it overheats if the unit is accidentally blocked.

Long-Lasting Performance

Prolongs the life of the heating element by keeping the fan off until the element is at the proper temperature.

Convenient Control

A factory-installed, double-pole thermostat with a positive ON/OFF position is included for easy installation and convenient control.

Technical Specifications:

Temp Range: 40°-90°F

CFM: 100

Grille Gauge: 20

Ideal Spaces:

Mechanical Rooms
Vestibules & Entrance Ways
Lobbies & Hallways
Hotel Stairwells
Restaurants & Medical Offices
Conference Rooms

MFQ SERIES

High Output Commercial Fan-Forced Wall Heater

Key Features:

Cover Protection

The stamped-steel front cover of this commercial fan-forced heater provides added durability to stand up to the wear and tear of high-traffic commercial spaces.

Safer Operation

This commercial fan-forced wall heater offers built-in overheat protection, keeping building occupants safe and more comfortable.

Maintenance Made Easy

The heater comes equipped with a simple on/off switch, so it can be completely turned off for easy servicing and routine maintenance.

WALL HEATERS

When **high output** and **extra CFM** are needed, look no further than the MFQ series wall heater. This commercial fan-forced heater is ideal for spaces that need the extra output or extra throw into the space. Whether a school, hospital, or other public space, the MFQ series is perfectly suited.

Technical Specifications:

Temp Range: 60°–90°F

CFM: 200

Grille Gauge: 18

Ideal Spaces:

Offices
Stores, Schools & Churches
Hospitals & Waiting Rooms
Dormitories
Airport Terminals
Reception Rooms
Lobbies, Corridors & Stairwells
Conference Rooms
Hallways

SRA SERIES

Commercial Fan-Forced Small Wall Heater

WALL HEATERS

Built with both durability and aesthetics in mind, the SRA series heaters offer a lot, in a **small package**. Whether a waiting room, small stairwell, office, or basement, this unit offers extra warmth, robust construction, and **aesthetic appeal** to meet the needs of your building's occupants.

Key Features:

Aesthetic Appeal

This series comes with two different grille finishes that will fit the space's design, while optimizing airflow.

Maintenance Made Easy

The heater comes equipped with a simple on/off switch, so it can be completely turned off for easy servicing and routine maintenance.

Delay Operation

This wall heater has a fan delay feature that waits until the unit warms up to begin blowing air into the room. The fan keeps operating until the unit cools down, so you get maximum heating performance.

Easy Temperature Adjustment

With an integrated thermostat included, this wall heater can quickly and easily be set to maintain your ideal comfort level.

Perpetual Protection

This wall heater features a permanently lubricated fan motor, so it will be ready for long-term operation with little required maintenance.

Technical Specifications:

Temp Range: 40°-90°F

CFM: 65

Grille Gauge: 20

GFR SERIES

Fan-Forced Register Style Wall Heater

WALL HEATERS

Commercial-grade heating in your home. This **quiet, fast-acting** heater is built to resemble a standard home heating vent. Its simple 3-piece construction makes it **easy to install**, and the CLIP-N-FIT® jumper system allows for easy adjustment of the heater's wattage level.

Key Features:

Home Heating

The unit can be wired to a remote thermostat and to provide rapid, quiet heating for spaces like offices, playrooms, bedrooms and baths.

Quiet Operation

Enjoy reliable air circulation and heating with this unit's quiet tangential blower.

Easy Installation

The unit is easy to install, with just three pieces to assemble (back box, fan deck and front grille). The register-like front grille offers a built-in look that resembles a traditional heat vent.

Field Adaptable

CLIP-N-FIT design allows you to lower the wattage at the point of installation to accommodate any space. Just clip out unnecessary jumpers and install.

Prevent Problems

For safe long-term operation, a thermal cutout feature with indicator light and one-time thermal fuse offer dual protection and prevent this model from overheating.

Technical Specifications:

Temp Range: 40°–85°F

CFM: 50

Grille Gauge: 20

Ideal Spaces:

Bedrooms
Living/Family Room
Kitchens
Bathrooms
Basements
Offices
Conference Rooms
Waiting Rooms

SED SERIES

Fan-Forced Small Wall Heater

WALL HEATERS

A unit **designed for commercial spaces** yet will fit perfectly in **residential applications**, where extra comfort and control are needed. With the right accessories, this unit can be installed on the **ceiling** or **surface-mounted** on the wall.

Key Features:

Shallow-mount Friendly

This fan-forced wall heater is best suited for shallow, recessed wall mounting. This makes it an ideal comfort solution for manufactured housing units and other spaces with thinner interior walls.

Localized Control

Use the built-in double pole thermostat or a remote, wall mounted thermostat for optimal room control.

Rapid Comfort

The heating element's open coil design warms up rapidly, so your room space does too. The simple design makes it easy to service and maintain the heater.

Double Protection

A built-in thermal cutout and one-time thermal fuse provide dual levels of overheat protection, for safe long-term operation of this heating unit.

Repair in No Time

This wall heater's wiring compartment is accessible to repair persons in the field, making it easy to perform service on the unit with minimal disruption to the room.

COS-E SERIES™

Residential Fan-Forced Zonal Wall Heater

WALL HEATERS

True zonal heating in a compact design that fits in anywhere. Its **fast-response heating element** kicks in quickly, providing warmth for your bedroom, bathroom or hallway. The CLIP-N-FIT® system, thermal fuse and self-hold limit makes **installation safe and easy**.

Key Features:

Instant Heating

CLIP-N-FIT feature allows installer to select the desired wattage with ease and therefore, warm up the room rapidly. Its fast-response element delivers warmth instantly.

Efficient Operation

Get reliable zonal heating without cold spots. The unit's multi-layer impeller delivers consistent airflow in an energy-efficient design

Suitable for Any Room

Compact design fits well in bathrooms, bedrooms and hallways for comfortable living all year round.

Localized Control

Use the built-in double pole thermostat with positive OFF, or a remote, wall mounted thermostat for optimal room control.

Dual Protection

This unit features a self-hold limit to protect against overheating, with a one-time thermal fuse backup.

Universal Design

Clean aesthetics and a compact frame make this heater an unobtrusive solution for any space.

Suggested Controls

For superior aesthetic appeal and **energy-efficiency** that fits well in designed spaces, choose this SmartSeries® architectural wall heater. Combine the heavy duty die cast grille and 4800w output, and this unit is the **perfect accent** to any home, office, or restaurant.

Key Features:

Program Your Week

This wall heater features a hidden LCD touchscreen with 5/2 day programmable control, so you can set your heating pattern to best fit the way you live and work.

Command at Your Fingertips

With an included infrared remote control, you can activate, adjust and program this wall heater's thermostat from anywhere in the room.

Output on Demand

This wall heater features a two-speed fan, so you can fine-tune your heat output to your desired level quickly. A fan only mode and hold function provide additional flexibility, ventilation and comfort.

Connect to Control

This SmartSeries wall heater connects to your existing Building Management System for centralized control of your entire climate system.

Guaranteed Peace of Mind

A five-year warranty covers this wall heater's steel-plate finned element, for long-lasting performance you can trust for years to come.

Dimensions and Clearances:

SmartSeries fan-forced wall heaters provide the **ultimate integration** with your building's climate system. The LED touchscreen-enabled programmable thermostat offers a control lockout feature so temperatures stay set at the level you control. Plus, the unit is **compatible with a Building Management System (BMS)** for easy monitoring and operation from a central location. Its augmented 4000-watt heat level makes it suitable for big rooms.

Key Features:

Heat Any Room

Provides reliable heat for any room or entryway, even larger and odd shaped ones. Perfect for dens, basements and finished attics, workshops, garages, offices and bathrooms.

Auto Adjust

Automatically adjusts heat output and fan speed to help reduce energy costs and provide powerful, quiet climate control.

Long Life

Prolongs the life of the heating element by keeping the fan off until the element is at the proper temperature.

Easy Level Setting

The built-in thermostat features a 5/2 Day program so you can set different temperatures for weekday and weekend use.

FFCH

Mounted flat or recessed to the ceiling, ceiling heaters bring unobstructed comfort to your space.

FFCH SERIES

Commercial Downflow Ceiling Heater

CEILING HEATERS

SmartSeries Plus

For commercial spaces that need **unobtrusive comfort**, install this downflow ceiling heater. Deliver **powerful warmth** to your office, conference room, lobby, waiting room or entranceway.

Now compatible with SmartSeries® Plus!

Key Features:

Two Enclosures Available

Order a surface or recessed enclosure, depending on your ceiling type and available space. Surface mounting extends only 6 inches into the room, while the recessed enclosure requires only 7 inches of internal clearance.

Adjustable Airflow

Choose a narrow pattern to focus heat on one particular area, or a wide pattern to blanket more area. Asymmetrical heating patterns focus output while providing generous coverage.

BMS Compatibility

Optional relays allow you to connect this ceiling heater to your central building management system, so you can control temperatures from one location.

Easy Installation

Included thumb pins hold the unit together, freeing both hands for installation on the ceiling surface or within an enclosure.

Technical Specifications:

Temp Range: 45°–90°F

CFM: 300

Grille Gauge: 20

Ideal Spaces:

Bathrooms
Offices
Conference Rooms
Lobbies

FFCH SERIES

Commercial Downflow Ceiling Heater

CEILING HEATERS

Dimensions and Clearances:

Adjustable Airflow Options:

Wide Pattern

(24x8 ft. coverage)
In standard ceiling applications (8-10 ft.), heater disperses the air to give a gentle, less pronounced pattern while circulating all the air from floor to ceiling.

Narrow Pattern

(8x8 ft. coverage)
For high ceiling applications (11-14 ft.), fan concentrates the heated air to ensure full penetration to the floor level.

Asymmetrical Pattern

(17x10 ft. coverage)
Heated air is directed in a specific direction, allowing the heater to be located where space allows, with the heated air delivered to where it is required.

Suggested Controls

Now compatible with SmartSeries Plus when used with 24VAC control transformer!

QFF SERIES

Ceiling-Mounted Fan-Forced Heater

CEILING HEATERS

Anywhere it makes sense to keep your heating solution **out of the way** and **out of reach**, choose these fan-forced ceiling heaters. A comfort solution for lobbies, restrooms or detention environments.

Key Features:

Flexible Installation

This heater accommodates three installation formats, so you can choose recessed mounting, T-Bar or surface application.

Ready to Connect

This ceiling heater easily accommodates low voltage and electric control schemes like those typically found in centralized BMS applications.

Fan Delay

The heater's fan waits until the desired temperature is achieved before blowing air into the room, and discharges all residual heat before shutting off.

Enhanced Control

This ceiling heater has an included on/off switch for safe, simple installation and maintenance.

Heavy-duty Design

This ceiling heater's 14-gauge steel louvered grille is fastened with tamper-resistant screws, for added security and durability.

Technical Specifications:

Temp Range: 40°–90°F

CFM: 150

Grille Gauge: 14

Ideal Spaces:

Hallways
Lobbies
Entryways
Restrooms
Detention Environments

QCH SERIES
Ceiling-Mounted Fan-Forced Heater

CEILING HEATERS

When **floor space is at a premium**, choose this fan-forced ceiling heater. It fits well in offices, bathrooms or lobbies, as well as attic and basement conversions.

Key Features:

Easy Installation

This heater features a simple, three-piece design for rapid installation, whether you choose a recessed mounting or surface application.

Safe Operation

For added safety, the included thermal cutout automatically shuts this heater down if it begins to overheat.

Fan Delay

The heater’s fan waits until the desired temperature is achieved before blowing air into the room, and discharges all residual heat before shutting off.

Enhanced Control

This ceiling heater offers dual wattage/voltage models to best fit your onsite power requirements. Plus it has an included on/off switch for safe, simple installation and maintenance.

Technical Specifications:

Temp Range: 45°–95°F

CFM: 65

Grille Gauge: 20

Ideal Spaces:

- Basements
- Offices
- Converted Attics
- Bathrooms
- Workshops
- Lobbies

HUHAA SERIES

Unit Heater

UNIT HEATERS

This **rugged** unit heater works well in industrial settings. Its **powerful output capacity** even makes it suitable for heating your loading dock or other indoor/outdoor transition spaces.

Dimensions and Clearances:

CATALOG NO.	HEIGHT	WIDTH	DEPTH
HUHAA03 & 05	16"	14"	7 ½"
HUHAA07 & 10	21 ¾"	19"	7 ½"
HUHAA15 & 20	21 ¾"	19"	12 ¾"
HUHAA25 & 30	30"	26 ⅝"	11 ¾"
HUHAA40 & 50	30"	26 ⅝"	17 ⅝"

Key Features:

Advanced Airflow

This unit heater’s pull-through design draws air in across the heating element, so it runs cooler while providing an even blanket of comfort across its output range.

Safe Operation

A linear thermal cutout provides automatic protection the entire length of the heating element. Plus, most models feature a 24V control transformer for safer temperature adjustment.

Precise Positioning

The heater is equipped with individually adjustable louvers that aim your warmth where you need it most. A venturi outlet delivers the additional airflow you need to mount the unit vertically.

Three Times the Metal

The steel sheath heating element is clad in copper and outfitted with aluminum fins. This sophisticated design helps the heater run more safely and cool down faster.

Everything You Need for Installation

This unit heater doesn’t require any piping flues, valves or traps. It’s self-contained and ready to install wherever you need extra warmth.

Technical Specifications:

Temp Range: 40°–90°F
CFM: 350–3000

†1-3" phase denotes field convertible to 3-Phase

NOTE: All standard units are supplied with a low voltage control transformer and contactor (24V). Reference the appropriate Bundled Accessory table below for the standard accessories available out of the box with each PRO and PRO+ model.

HUHA SERIES
Unit Heater

UNIT HEATERS

Optional Accessories:

Table with dimensions A through N for 3-20 kW and 25-50 kW units.

Optional Mounting Brackets:

Table with 5 columns: CATALOG NO., UPC, COMPATIBILITY, SHIP WT., and rows for Standard, Ceiling, Vertical Ceiling, and Remote Thermostats.

MOUNTING LIMITATIONS: Unit heaters should not be used in potentially explosive atmospheres. The finish is not intended for direct salt spray exposure in marine applications or the highly corrosive atmospheres of swimming pools, chemical storage bins, etc.

Optional Dust Shields:

Table with 4 columns: CATALOG NO., UPC, COMPATIBILITY, SHIP WT., and rows for dust shields.

Diffuser Selector Table:

Table with 4 columns: CATALOG NO., UPC, COMPATIBILITY, SHIP WT., and rows for diffusers.

Optional Field-Installed Electrical Controls:

Table with 4 columns: CATALOG NO., UPC, DESCRIPTION, ELECTRICAL RATING, and rows for various electrical controls.

NOTE: Any field installed options assembled in the factory require added surcharge. See price book for charges. MPDS60 disconnect switch is not suitable for field installation on 7.5kw and 10kw unit heaters.

Diffusers for Vertical Mounting:

No Diffuser: No diffuser needed where a straight downflow air pattern is required. For maximum air throw, remove louvers. Any of three diffusers can be added to basic heater.

Louver Diffuser: Permits directional (straight line) air flow as in air curtain application over doorways. Rectangular coverage, Louvers can be turned in either direction.

NOTE: Visit website or contact your local representative for additional details

Suggested Controls section featuring a digital thermostat image and text: 'Now compatible with SmartSeries Plus when used with 24VAC control transformer!'.

NEW PRODUCT!

HUHAA-PRO Series Bundled Unit Heater

Pre-bundled package streamlines ordering. **Eliminates the need for custom configuration** by including all of the most commonly-ordered accessories.

HUHAA-PRO+ Series Bundled Unit Heater

"1-3" phase denotes field convertible to 3-Phase

NOTE: All standard units are supplied with a low voltage control transformer and contactor (24V). Reference the appropriate Bundled Accessory table below for the standard accessories available out of the box with each PRO and PRO+ model. Shipping weight includes mounting bracket.

On dual-voltage units CFM, FPM, & RPM ratings are listed at higher voltage operation. On dual-phase units maximum amp draw is listed for respective voltage.

HHUHAA-Pro Bundled Accessories:

ACCESSORY	DESCRIPTION
24VAC Transformer	Takes incoming line voltage and drops it to low voltage (24VAC) to be used with low voltage thermostats.
Disconnect Switch	A three pole non-fused disconnect switch disconnects power to the heater. Design prevents entry into the control compartment until disconnect switch is turned to the OFF position.
Built-In Single Stage Thermostat	Built-in single stage thermostat with adjustable knob to have heater run until demand is satisfied.

HUHAA-Pro+ Bundled Accessories:

ACCESSORY	DESCRIPTION
24VAC Transformer	Takes incoming line voltage and drops it to low voltage (24VAC) to be used with low voltage thermostats.
Disconnect Switch	A three pole non-fused disconnect switch disconnects power to the heater. Design prevents entry into the control compartment until disconnect switch is turned to the OFF position.
SmartSeries [®] Plus thermostat	Remote Mount two stage thermostat runs 2/3 elements on stage 1 and full heat for stage 2. Fan cycles on high speed only. Comes with BACnet BMS compatibility, scheduling, cooling mode (Fan-Only), and keypad lock.
B10 mounting bracket	Used to easily mount the unit heater to the wall

HUH SERIES

Industrial Unit Heater

UNIT HEATERS

This heavy-duty heater provides a **long-term comfort solution** wherever you need to warm up — garages, workshops, basements, even outdoor spaces. Aim heat anywhere with adjustable louvers and **flexible mounting options** for both horizontal and vertical applications.

Key Features:

Long-lasting Comfort

If you've got a constantly cold and drafty garage, basement or workshop, this heavy-duty heater provides a worthy long-term solution. Its powerful output means you can even use it to warm outdoor areas.

Conforms to Your Power System

Whether you need 208 or 240 volts, this heater is fully compatible with your electrical system.

Control Your Output

Multiple wattages enable you to set your heat output level to deliver as much warmth as you need.

Directional Heating

This model features adjustable louvers, so you can aim your heat directly toward your desired area and redirect it whenever your heating needs change.

Install Anywhere

This heater easily makes room for itself. With an optional mounting bracket, this unit can be easily installed vertically or horizontally in any room.

Scan the QR code to access additional specs and features.

Unit Heater

UNIT HEATERS

For primary or spot heating in factories, warehouses, garages, and other **open areas**, these unit heaters excel. With a **variety of mounting and airflow options**, you can create just the right comfort level for your space.

Dimensions and Clearances:

Key Features:

Angle Your Airflow

These unit heaters are designed for maximum flexibility. Install them to create vertical or horizontal airflow patterns or direct them at any angle you desire.

Space Saving Solution

With an included mounting bracket, you can install these unit heaters on a wall or ceiling to make best use of your available installation space and to cover the widest area possible.

Temperature Control

These unit heaters feature a built-in bimetal thermostat, plus a heat selector switch that allows you to select the right wattage for your space.

Fan Only Operation

When you don't need extra heat, set this unit heater to fan only mode for extra airflow and cooling.

GH48R SERIES

Digital Remote-Controlled Garage Heater

UNIT HEATERS

Remote control requires (2) AAA batteries. Not included.

Turn your cold garage into a **year-round usable living space** with this robust, reliable fan-forced garage heater. The included bracket makes for easy installation on the wall or ceiling of your garage, workshop or stockroom. The included remote control and timer feature make it simple to set the right temperature and to make sure the heater is **only running when you need it**.

Key Features:

Warm Up Cold Spaces

This powerful heater can go beyond the garage — install it in storage areas stockrooms, workshops, or any other space you need primary or supplemental heat.

Long-Lasting Performance

The unit's built-in fan delay is designed to prolong the life of your heating element.

Total Control

A 9-hour timer with automatic shutoff brings the heat when you need it, while the integrated thermostat ranges from 45° to 99° F to handle your specific garage conditions.

Easy Viewing

The easy-to-read digital LED interface lets you tell at a glance what the current temperature level is.

Stay in Control

The included remote allows you to set your perfect temperature even from across the room.

Technical Specifications:

Temp Range: 45°–99°F
CFM: 160

Ideal Spaces:

- Garages
- Workshops
- Stockrooms
- Mechanical Spaces

Standard Accessories – FFW Models:

ACCESSORY	DESCRIPTION
Built-In Thermostat	Built-in single stage thermostat with adjustable knob to have heater run until demand is satisfied.
Manual Reset	Manual Reset over temperature cutout wired into control circuit. Supplied in addition to auto-reset cutout.
Dead Front Disconnect Switch	A three pole non-fused disconnect switch disconnects power to the heater. Design prevents entry into the control compartment until disconnect switch is turned to the OFF position.
Fan/Heat High/Low Switch	Allows user to select whether the heater will run in low mode (2/3 output) or high (full output).
ON/OFF Switch	Allows the user to turn off the unit so it will not run during warm months or when not needed.

Standard Accessories – FFWD Models:

ACCESSORY	DESCRIPTION
SmartSeries® Plus	Built-in two stage thermostat runs 2/3 elements on stage 1 and full heat for stage 2. Fan cycles on high speed only. Comes with BACnet BMS compatibility, scheduling, cooling mode (Fan-Only), and keypad lock.
Manual Reset	Manual Reset over temperature cutout wired into control circuit. Supplied in addition to auto-reset cutout.
Dead Front Disconnect Switch	A three pole non-fused disconnect switch disconnects power to the heater. Design prevents entry into the control compartment until disconnect switch is turned to the OFF position.

BPH SERIES

Plenum-Rated Unit Heater

Concealed Space Use — Zero Clearance

UNIT HEATERS

This zero-clearance, plenum-rated unit heater fits unobtrusively into **unique spaces** where you need freeze protection or extra comfort for occupants. It even connects to **existing ductwork**, making it easy to integrate with your building's environmental system.

Key Features:

Concealed Comfort

Address the warming needs of plenum spaces, drop ceilings and other concealed areas with this targeted unit heater. Its zero clearance design allows it to fit into spaces other heating solutions can't reach.

For Any Heating Job

These unit heaters deliver a wide range of output levels, and select models offer a two-speed fan for additional power and specific control of your output temperature.

Plenum-Rated Protection

Install this unit heater anywhere you have sensitive pipes, conduits or other equipment that might be vulnerable to freezing. It provides reliable output to keep your sensitive infrastructure running smoothly.

Plenum-Rated Unit Heater

Concealed Space Use — Zero Clearance

UNIT HEATERS

Concealed spaces can be tricky to heat. Choose plenum-rated unit heaters for just that purpose. They provide warmth and **freeze protection** in areas that are otherwise difficult to reach with your main heating solution.

Key Features:

Plenum-Rated Protection

Install this unit heater anywhere you have sensitive pipes, conduits or other equipment that might be vulnerable to freezing. It provides reliable output to keep your sensitive infrastructure running smoothly.

Concealed Comfort

Address the warming needs of plenum spaces, drop ceilings and other concealed areas with this targeted unit heater. Its zero clearance design allows it to fit into spaces other heating solutions can't reach.

Warm Air Only

This unit heater features a fan delay, allowing its heating element to warm up before it begins blowing air into the space.

One Connection

This unit heater is equipped for single-point field wiring, so you can easily install it, and easily disconnect from power when it's time to service it.

Technical Specifications:

Temp Range: 40°-90°F
CFM: 150

Ideal Spaces:

Between Finished Ceiling & Drop Ceiling

Plenum Areas
Freeze Protection

PERFORMANCE AND SAFETY

Reliable baseboard heaters are strong enough to be used for primary heating and versatile enough to provide supplemental warmth for cold spots and hard-to-reach areas.

HBB SERIES

Electric Hydronic Baseboard Heater

BASEBOARD

The heater **keeps on radiating warmth**, even after the thermostat shuts off, due to its fluid-immersed, sealed heating element. Its **low-profile design** makes it a perfect fit for bedrooms, bathrooms, living rooms and dens.

Key Features:

Fewer Allergens in the Air

Heat your space without kicking up dust or other allergens. The natural convection airflow doesn't rely on a blower or fan to move warm air throughout the room

Stable, Gentle Heat

Hydronic baseboards put out smooth, steady warmth without large temperature swings. Their sealed-tube heating element heats up quickly and stays that way for a more stable room climate.

Continuous Comfort

Even after the thermostat turns off, this unit continues heating the room, thanks to its fluid-immersed heating element that better retains warmth to keep your room cozy for longer.

Superior Safety

Heavy-duty welded steel louvered grille discourages insertion of foreign objects and low surface temperatures make it safe for installation around pets and children.

Versatile Installation

Built-in s, lead wires, and knockouts allow for quick field connection from either end, whether surface mounted on a wall or flat on the floor.

Ideal Spaces:

Bedrooms
Living/Family Room
Basements
Offices
Conference Rooms
Waiting Rooms
Entrance Ways

Electric Baseboard Heater

BASEBOARD

For **quiet**, comfortable heating, choose these baseboard heaters. These **fan-free heating** units deliver warmth and comfort in a **low-profile housing** that's safe to install on the wall or directly on carpet, tile or other flooring.

Key Features:

Fast-Acting Warmth

Convection heats the room rapidly, without uneven hot and cold zones, providing comfort from floor to ceiling.

Fewer Allergens in the Air

Heat your space without kicking up dust or other allergens. The natural convection airflow doesn't rely on a blower or fan to move warm air throughout the room.

Installs Quickly and Easily

Wire up and connect this baseboard quickly and easily with its large wiring compartment, dual knockouts and built-in cable clamp.

Optimum Efficiency

For maximum efficiency, the unit converts all incoming electric energy into heat, according to Department of Energy standards.

Safe Operation

For worry-free warmth, these UL Listed baseboard heaters offer an overheat protection feature that prevents the unit from running when its air intake is blocked.

Ideal Spaces:

Bedrooms
Living/Family Room
Kitchens
Basements
Offices
Conference Rooms
Lobbies
Waiting Rooms

Find out how you can incorporate THX into your next supplemental heating spec. Visit CustomHeatSolutions.com/THX-Trench-Heater or contact your Berko representative.

BKOC SERIES

Commercial Baseboard Heater

BASEBOARD

Commercial baseboard heaters provide comfort with **no need for a fan or blower**. Their durable design allows for safe, reliable operation in **high-traffic areas** like hallways, lobbies and waiting rooms.

Key Features:

Fast-Acting Warmth

Convection heats the room rapidly, without uneven hot and cold zones, providing comfort from floor to ceiling.

Fewer Allergens in the Air

Heat your space without kicking up dust or other allergens. The radiant airflow doesn't rely on a blower or fan to move warm air throughout the room.

Durable Design

Add heat and comfort to high-traffic hallways and lobbies. The unit's commercial-grade cold-rolled steel cover and bracket protect the heating mechanism from damage.

Installs Quickly and Easily

Wire up and connect this baseboard quickly and easily with its large wiring compartment, dual knockouts and built-in cable clamp.

Optimum Efficiency

For maximum efficiency, the unit converts all incoming electric energy into heat, according to Department of Energy standards.

Ideal Spaces:

- Bedrooms
- Living/Family Room
- Kitchens
- Bathrooms
- Basements
- Offices
- Conference Rooms
- Hallways
- Waiting Rooms

A blanket of warmth for hard-to-heat areas

RADIANT HEATERS

Radiant technology works like the sun's rays to put warmth right where you need it — without having to heat (or pay for heating) the surrounding air.

**Customizations
AVAILABLE!**

Offices & Basements

Why Radiant Heating

SAVE ON ENERGY & MAINTENANCE COSTS

By transferring warmth directly, radiant heaters don't waste energy heating the surrounding air. With no filters or moving parts to maintain, they are less costly to service as well.

HEAT WHERE AND WHEN YOU NEED IT

As a direct heat source, radiant output is unaffected by wind and rain. Berko radiant heaters can be used for everything from snow removal to cozying up counter and desk areas.

CLEANER ALTERNATIVE TO GAS HEATING

Berko radiant heaters can be installed in tight spaces with little to no clearance. There's no need for ducting or exhaust, so these heaters operate cleanly without circulating dust or fumes.

Versatile, Superior Value Both Indoors and Outdoors

Instant & Targeted Heat: Infrared energy delivers direct, uniform and localized heat — heating people and objects rather than the air, just like the sun.

Clean & Safe Heat: No fumes, odors or combustion. Does not circulate dust or other irritants and allergens.

Energy Efficient: Optimized shortwave infrared energy delivers continuous comfort efficiently without energy waste due to the wind and heating of the surrounding air.

Easy to Install: No need for gas lines, ducting or venting. Install in compact spaces.

Low Maintenance: No filters or moving parts to service.

Money Savings: Minimal upfront costs due to material and labor. Minimal energy usage and no need to purchase propane or other fuels to maintain operation.

*Customizations not available for all products.

CP SERIES

Radiant Ceiling Panel

RADIANT HEATERS

Radiant ceiling panels go where other comfort solutions can't. With three mounting options, they can **fit any ceiling space**, helping to offset heat loss through perimeter windows and entrances. Install them in your bathroom, office or studio—anywhere you need to keep warm and **conserve floor space** for activities.

Key Features:

The Clear Choice

Keep floor and wall space free for use with radiant ceiling panels. They are compatible with almost any ceiling type and make a welcome addition to any cold room.

Save Money and Energy

By offsetting heat loss efficiently, radiant ceiling panels are able to keep you comfortable without overtaxing your main HVAC system or your energy budget.

Easy Operation

Radiant ceiling panels put out heat with no moving parts. This makes them quieter to operate and also lowers their maintenance cost.

Preserve Your Heating Envelope

Radiant ceiling panels provide clean, gentle, comfortable heat. This makes them a perfect choice for offsetting heat loss in drafty spaces and rooms with large windows.

Keep Clear

With no fan or exhaust, radiant ceiling panels heat without drying out room air. This also reduces the need to clear settled dust and particles from your ceilings, walls and drapes.

For gentle heating in spaces **where wall space is at a premium**, select a cove heater. It **mounts easily** on the wall, providing warmth for your living room, bedroom, bathroom, basement or office.

Key Features:

Fanless Operation

This cove heater’s radiant design allows it to warm the room without the use of a fan, for less noise and circulation of particles in the air.

Easy to Maintain

The lack of moving parts means this unit can function well over the long term without the wear and tear associated with motors and fans that break down over time.

Uniform Comfort

With an aluminum front panel coated with high temperature textured paint, this cove heater focuses on radiating as much heat energy as possible into the room.

Out of Reach

The cove heater is ideal for those spaces where occupant safety is top of mind and quiet operation is desired. Installed high up on the wall and out of reach of occupants, the cove heater delivers clean, gentle comfort to the space.

Technical Specifications:

Length: 34"-132"

Output: 450-1800 watts

Ideal Spaces:

- Offices & Retail Spaces
- Hallways & Lobbies
- Conference Rooms
- Day Care Centers
- Geriatric Facilities
- Laboratories
- Living Room & Kitchens
- Bathrooms
- Basements

Introduction

Infrared technology permits the heating of areas where it is impractical, either economically or physically, to heat air. The physics that causes warm air to rise and cool air to fall are constantly working against forced air heating systems, particularly in outdoor or high ceiling areas. The radiant heat energy emitted by infrared heaters is transferred direct to the people and objects under them. It is the same principle that allows the sun to make a clear, cold day feel warm. The radiant energy from infrared heaters can be directed and focused in any direction to evenly blanket people and equipment with comforting warmth, free from drafts and noisy fans or blowers.

Selecting the Right Models

Keep in mind these elements when selecting the correct infrared heater for your needs. **Consult your MEP sales representative for additional design assistance.**

- 1. **Type of application:** area heating, snow melting, or spot heating
- 2. **Type of environment:** outdoors, indoors, marine or corrosive atmospheres
- 3. **Design area:** square footage, objects/people standing or sitting
- 4. **Watt density required to maintain comfort**
- 5. **Mounting height**
- 6. **Selecting Proper Heat Pattern**

7. Selecting Proper Heating Elements

Metal Sheath <i>High Traffic Areas</i>	Quartz Tube <i>Indoor/Outdoor Area/Spot Heating</i>	Quartz Lamp <i>High Bays, Snow Melting</i>	Flat Panel Emitter <i>Indoor/Outdoor Area/Invisible Heating</i>

RESPONSE TIME, DESIGN TO SPEC, INTENSITY/OUTPUT, EFFICIENCY

- 8. **Product Selection** After determining the requirements above, visit the product portion of our catalog to select appropriately sized heaters for your application. Contact your sales representative for more information on which infrared heaters will work for your specific application.
- 9. **Control Optimization** For the optimal preforming solution, it is important to understand how the application space should be controlled. Marley offers a variety of control solutions for various types of application needs. Please consult your sales representative for more information on which control options are ideal for your specific application.

For Spaces that Require High Output & Optimal Design Flexibility

The Berko infrared heater line is designed with multiple configurations and options to meet the unique requirements of any environment. Whether you need targeted spot heating or snow melting solutions for harsh winter conditions, our systems deliver exceptional performance and reliability. With a focus on flexibility, our products adapt seamlessly to your specific needs, ensuring optimal efficiency and comfort. Ideal for residential, commercial and industrial applications, our solutions provide the perfect balance of functionality and design.

VRP & VRS INFRARED

Elevate the safety and comfort of your outdoor spaces with infrared heat from Berko. The 2- or 3-element models provide concentrated heating capacity in a single infrared radiant heater. Specifically designed for high output and rapid response, these heaters are the perfect solution for supplemental or spot heating target areas.

VRP & VRS INFRARED WITH RECESSED FRAME

Keep visitors warm and comfortable with our recessed infrared heater. This heater combines an VRP or VRS infrared unit with an additional trim kit accessory that enables the heater to be used in spaces with overhangs without consequence of wind or inclement weather adversely affecting the installation of the heater or obscuring the surrounding views.

Preserve sight lines and reclaim space with a mostly hidden heat source that installs right in the ceiling.

Learn more about this versatile radiant heater on page 180

Multiple configurations and accessories—including sleek recessed trim kits—are listed in the custom capabilities portion of this catalog

THERMAZONE® SERIES

Industrial/Commercial/Residential Infrared Heater

RADIANT HEATERS

With **no moving parts** to wear out, Thermazone will last you for years to come, all the while giving you **safe, clean, energy-efficient heat**. There are no combustion products discharged, no flames, and no noxious gases emitted. Meaning there is no need to ventilate.

Key Features:

No Moving Parts

Nothing to break or wear out means the Thermazone is maintenance free.

No Lamps

Save yourself money and frustration by never having to replace a lamp.

No Reflectors to Clean

No lamps mean no need for reflectors. Another reason Thermazone® heaters require zero maintenance.

No Orange Glow

Every Thermazone has a clean, black face which does not give off any light, meaning it neatly blends into the background.

100% Electric

No flames or noxious gases means Thermazone heaters are odor free and do not require ventilation.

Superior Energy Efficiency

Nearly all of the energy provided to the heater is converted into useful heat.

SSR Panel

Key Features:

Wide Range of Configurations

Factory-wired for efficient installations to include terminal blocks, multi-position selector switches, 24V or 120V low voltage control circuit, and other project specific accessories. Three phase panels available with 30A or 60A contactors in 2, 5, 10 or 20 unit designs; supply voltage from 208-600V. Single phase panels available with 30A contactors in 2, 5, 10 or 20 unit designs; supply voltage from 120-600V.

Enclosure Options

Nema Type 1 and Type 3R enclosure available, cULus listed and labeled control panels.

Suitable for Low and Medium Cycle Controllers

Designed to take in a wide variety of inputs. As example: standard wall thermostats, smart thermostats, on/off, timers, rheostats, percentage timers, and custom touch screen operation.

Zone Control

Single and multi-zone control capability.

GFI Protection

GFI protection can be added to all 30A options for the 2, 5, and 10 circuits panels.

Customizations

Custom panels available to include BACnet support, BMS integration, touch screen control, safety disconnects, and anything else your project requires. Reach out to your local Marley sales representative for additional details.

JRK SERIES

Commercial/Industrial Single-Element Infrared Heater

RADIANT HEATERS

These infrared heaters work well in garages, loading docks, hangars and warehouses. Their single quartz element provides reliable output that is **unaffected by outside air movement and drafts.**

Key Features:

Rugged and Reliable

This infrared heater's steel internal parts and high quality finish make it a reliable, easy to maintain choice for industrial environments where durability is key. Water resistant for outdoor adjacent spaces.

Elite Heat

A heavy duty gold-anodized reflector allows this heater to deliver one of the highest levels of radiant heat energy possible.

Flexible Mounting

Chains are included for easy suspended ceiling applications. An optional wall mounting bracket allows you to approach your heating needs from other angles as well.

Safety Screen

Install the optional HWG wire guard to create a preventative barrier that stops foreign objects from contacting the heating element.

Technical Specifications:

Element Type: Quartz Lamp

Reflection Angles: 60° Sym.

Ideal Spaces:

Parking Garages
Showrooms
Work Stations
Loading Docks
Aircraft Hangers
Warehouses

Bronze

- 12 in. to vertical side walls
- 36 in. between heaters mounted side by side. Heaters may be mounted end to end.
- 3 in. to ceiling
- 96 in. to floor

XRM SERIES

Industrial Washdown Infrared Heater

RADIANT HEATERS

2.0 kW Fixed*

4.5 kW Fixed*

6.0 kW Fixed*

13.5 kW Fixed with Grille*

Industrial stainless steel infrared heaters provide **fan-free warmth** in open areas like repair bays, walkways, assembly areas, foundries and loading docks.

Key Features:

High Output

The heavy duty U-bend heating element provides high wattage density, converting energy directly to heat at 100% efficiency at high efficiencies.

Wash-Down Capable

A sealed wiring compartment means you can wash down this unit safely and easily without worrying about moisture affecting its operation.

Rugged and Reliable

Designed for harsh industrial settings, these stainless steel heaters provide a durable source of heat. Optional safety grilles can be added for extra protection.

* Product images are shown at an angle for display purposes only and cannot be installed in this manner.

Technical Specifications:

Element Type: Metal Sheath

Reflection Angles: 90° Sym.

Ideal Spaces:

Wastewater Treatment Plants
Loading Docks
Foundries
Auto or Marine Repair Facilities
Walkways
Assembly Areas
Enclosed Smoking Areas
Indoor Storage Areas
Covered Outdoor Storage Areas

Extruded Aluminum

SKU Legend: ● = Popular Products ● = Extended Offering ■ = Made to Order (Contact your local Marley Sales Representative for typically associated lead times)

NOTE: Metal Sheathed: used indoors in high-traffic areas. Maintain at least 5 ft. in radiant path, between bottom of heater and combustible material. Pigtail element leads for a more positive connection in high-traffic areas where physical abuse. See following page for infrared accessories. Ground Fault Detection: Ground fault detection equipment is designed to monitor for any gradual changes in the insulation level due to humidity or mechanical damage as it develops, thus, de-energizing the load to prevent arcing type faults, preventing premature element failure and potential fire damage. As a safety precaution it is highly recommended that industrial infrared heaters must be protected by ground fault detection. Failure to comply could result in a building fire or serious equipment damage.

Portable heaters deliver efficient heat with easy-to-control comfort settings and built-in safety features.

For personal heating at desks, tables, counters & other workstations, you need something safe, economical and easy to control.

Comfortable heat where you need it.

BSDH

QTS

MMHD

Their rugged, durable construction make them ideal for construction sites, garages, workshops and for cold office spaces and in bedrooms, family rooms and basements.

202SL SERIES

Radiant Plug-In Under Desk Heater

PORTABLE &

SPECIALTY HEATERS

For **personal heating** you need something safe, economical and easy to control. This under desk heater meets these needs and more. Set it into place, flip the switch, and this unit **immediately puts out radiant warmth**, so it's perfect for close quarters.

Low cost of ownership

and energy usage

< \$20 = 1 Heat Season*

*Usage costs estimates based on energy cost of 10 cents per kWh,
1 Day = 8 hrs., 1 Week = 5 Days and 1 Heat Season = 6 Months

Key Features:

Quiet, Unobtrusive Comfort

For personal heating that won't make noise or disrupt your space, choose an under desk heater. It fits in well at desk, table and counter areas in your family room, office or reception space.

Dual Installation Options

This heater is designed for freestanding operation, or it can be mounted to the wall to free up floor space.

Quick Setup

This heater offers radiant heat in a convenient package with its included power cord and three-prong plug. Just plug it in and you're ready to start heating.

Easy Operation

A lighted on/off switch makes it simple to turn the heat on or off, even in a dark room.

Ideal Spaces:

- Bedrooms
- Living/Family Room
- Kitchens
- Basements
- Offices
- Conference Rooms
- Lobbies
- Waiting Rooms

WHT500 SERIES
Utility Well House Heater

PORTABLE &
SPECIALTY HEATERS

This utility heater provides **long-lasting protection** to keep sensitive equipment running strong. Install it in well houses, utility rooms, relay stations or other areas **where pipes and machinery are vulnerable to freezing.**

Key Features:

Guard Against Freezing

Protect pipes and other fluid-filled machinery from freezing damage with this utility heater. Its aluminum-finned element heats rapidly, and its steel sheath keeps the element cool for longer run time without maintenance.

Tamper-Resistant

Keep live voltage out of the element heating area. The heater features a tamper-resistant control box that contains the power supply and wiring for the unit.

Simple Temperature Management

Simply set the thermostat to your desired temperature with no need for further adjustments for 24-hour, worry-free heating.

Durable Design

Rely on this utility heater for freeze protection, even under rugged conditions. The unit is housed in a galvanized steel cabinet with a corrosion-resistant, epoxy-painted coating to endure seasonal changes and temperature swings.

Field Adaptable

The unit is easily field convertible to 120V, as the installation dictates.

Ideal Spaces:

- Wastewater Treatment Plants
- Pump Houses
- Utility Rooms
- Relay Stations
- Construction Sheds
- Cabins

MMHD SERIES

Portable Fan-Forced Utility Heater

PORTABLE &

SPECIALTY HEATERS

Whether you need extra warmth in your family room, basement or home office, this portable utility heater will suit your needs. **Just plug it in** and you are ready to go. The **built-in thermostat** allows you to set just the right temperature for quick comfort in any interior space.

Key Features:

A Rapid Solution

This portable electric heater offers efficient comfort. Its fan-forced design provides rapid output, so you can bring your room up to the desired temperature as soon as possible.

Increase Circulation

When you just want to clear the air, set this heater to fan-only mode. Fan only mode is also an excellent option when the room is already heated to your desired temperature.

Comfort Anywhere

The included grounded plug and 6-foot power cord allow you to move this heater from room to room for comfort that follows you throughout your day.

Easy Operation

The built-in thermostat allows for easy temperature management and control, so you can keep your space as comfortable as possible.

Two-Level Comfort

Two distinct heat settings allow you to heat both large and small spaces. You can quickly and easily double your output to bring more warmth to a wider area.

Ideal Spaces:

- Bedrooms
- Offices
- Conference Rooms
- Lobbies
- Waiting Rooms

MCM SERIES

Portable Fan-Forced/Radiant Utility Heater

PORTABLE & SPECIALTY HEATERS

This portable utility heater easily switches between **fan-forced or radiant heat**. With varying heat levels and the option to go fanless, it is equally at home in the garage or workshop as it is in playrooms and bedrooms. Dual heating modes and three heat levels give you **precise control** over your comfort level.

Key Features:

Two Ways to Heat

This heater's unique design allows it to run in either fan-forced or radiant mode. So whether you want a quieter room, more air circulation or increased output, this is the most adaptable solution you can find in one convenient portable package.

Comfort Anywhere

The included grounded plug and 6-foot power cord allow you to move this heater from room to room for comfort that follows you throughout your day.

Triple Your Comfort

Three built-in heating levels allow you to adapt your settings for both large and small spaces. You can quickly and easily increase your output to bring more warmth to a wider area.

Heat for Where Life Happens

When you need extra warmth in your family room, basement, playroom or home office, choose this portable heater. Its dual operating modes and rugged design make it a fine choice for garages, workshops and construction sites as well.

Modern Design

A chrome grille offsets the white baked enamel finish on this heating unit, providing a contemporary accent that warms your home and looks good while doing it.

Ideal Spaces:

- Bedrooms
- Living/Family Room
- Kitchens
- Basements
- Offices
- Conference Rooms
- Lobbies
- Waiting Rooms
- Garages

NPH4A SERIES
Portable Unit Heater

PORTABLE &
SPECIALTY HEATERS

When the temperature drops, bring in some extra warmth with a **heavy-duty** portable heater. With the option to go **freestanding** or **mounted** on the wall or ceiling, it fits perfectly in your garage, workshop or jobsite.

Key Features:

Bring the Heat

This portable electric heater brings heavy-duty fan-forced warmth wherever you need it. The built-in carry handles and 6-foot cord with 240V plug allow you to set up quickly and start heating right away.

Two-Level Comfort

Two distinct heat settings allow you to heat both large and small spaces. Set it to 9100 BTU per hour (2667 watts) or crank it up to 13650 BTU per hour (4000 watts) and bring more warmth to a wider area.

Set Up Anywhere

Portable design provides freestanding warmth wherever you need it. If you’ve got longterm heating needs, this heater can also be mounted to the wall or ceiling for space-saving convenience.

Warm While You Work

This portable heater delivers powerful, versatile heating for garages and other spaces like workshops or construction sites. Bring one along whenever your task takes you out into the cold.

Ideal Spaces:

- Garage
- Work Bench
- Utility Room
- Job Site

BRH SERIES
Contractor Heater

PORTABLE &
SPECIALTY HEATERS

Keep warm while you work **wherever the job takes you** with this heavy-duty portable construction heater. Its rugged, **low-maintenance design** and easy portability make it a welcome addition to your garage, workshop or jobsite.

Key Features:

Steel Performance

For maximum heat transfer, this model comes equipped with a metal sheathed heating element with a steel spiral fin.

Low Maintenance

For easy operation without the need for repeated maintenance, this heater features a permanently lubricated fan motor so it can keep running strong over the long haul.

Keep Objects Out

The industrial steel intake and discharge grille prevents foreign objects (or people’s fingers) from reaching the heater’s inner workings.

Safe Operation

The unit’s high temperature limit prevents it from overheating, so you can leave the heat on even when you’re not present.

Complete Control

This portable construction heater comes equipped with a built-in double-pole thermostat with a positive off switch, so you can be sure it’s off before you leave the room.

Ideal Spaces:

- Garage
- Work Bench
- Utility Room
- Job Site

FHP SERIES

Portable Electric Hydronic Heater

PORTABLE &
SPECIALTY HEATERS

This hydronic baseboard heater provides **long-lasting comfort** on cold nights. This 120-volt, plug-in portable baseboard model uses liquid-element technology to provide **warm, gentle heat** at a lower surface temperature, so it's safe to use around pets and small children. This UL-listed hydronic heater **prevents overheating**, thanks to its thermal cutoff switch.

Key Features:

Use Right Out of the Box

Start heating immediately. This portable hydronic baseboard heater comes equipped with a standard 120-volt plug, so you can quickly add it to any room that needs extra warmth.

Cooler to the Touch

This baseboard model provides worry-free heating around pets and kids thanks to its hydronic design.

Never Hear a Ping

This convection heater starts up and stops without the disruptive popping or pinging sounds given off by traditional baseboard models.

Circulate Heat, Not Debris

Keep dust and other particles from circulating, thanks to this hydronic baseboard heater's fanless operation. With no blower or exhaust fan, allergens and dander won't be blowing around the room.

Optimum Efficiency

Keep the room comfortable and reduce unnecessary on/off cycles with up to 100% energy-efficient design.

Ideal Spaces:

- Bedrooms
- Living/Family Room
- Kitchens
- Basements
- Offices
- Conference Rooms
- Lobbies
- Waiting Rooms

FBE SERIES
Portable Electric Convector Heater

PORTABLE &
SPECIALTY HEATERS

For **uniform heat** in any room. The Portable Electric Convactor Heater’s variable wattage element provides comfort from floor to ceiling, without hot or cold spots, using **natural convection currents** to move warm air instead of a fan or blower. The unit’s 120-volt plug allows you to use it in almost any room, and the built-in thermostat provides effective control. Its **low-profile design** means you can tuck it away without worrying about overheating, thanks to its **automatic thermal cutoff** function.

Key Features:

Use Right Out of the Box

Start heating immediately. This portable baseboard heater comes equipped with a standard 120-volt plug, so you can quickly add it to any room for extra warmth.

Circulate Heat, Not Debris

Keep dust and other particles from circulating, thanks to this hydronic baseboard heater’s fanless operation. With no blower or exhaust fan, allergens and dander won’t be blowing around the room.

Optimum Efficiency

For maximum efficiency, the unit converts all incoming electric energy into heat, according to Department of Energy standards.

Safe Operation

For worry-free warmth, the unit’s overheat protection feature prevents the heater from running when its air intake is blocked.

Keep Cozy

This baseboard heater installs unobtrusively in bedrooms, bathrooms, living rooms and dens, thanks to its low-profile design.

Ideal Spaces:

- Bedrooms
- Living/Family Room
- Kitchens
- Basements
- Offices
- Conference Rooms
- Lobbies
- Waiting Rooms

QTS SERIES

Toe Space Fan-Forced Heater

PORTABLE &
SPECIALTY HEATERS

This electric toe kick heater installs under cabinets in kitchens, bathrooms, stairwells and more — providing **floor-level warmth** whenever you need it. Get quiet, even heat in a **slim design** that saves wall and floor space.

Key Features:

Hushed Heating

Keep warm without the noise, thanks to a compact, cross-flow blower that limits sound output while still delivering plenty of power.

Complete Control

Easily set your desired temperature with a remote wall-mounted thermostat or a built-in thermostat (select models only).

Heat Evenly

The steel-plate finned heating element is arranged in a uniform grid pattern for even heating and no wasted energy

FDI SERIES
Floor Drop-In Heater

PORTABLE &
SPECIALTY HEATERS

For ground level comfort, choose a drop-in unit heater. These units are specifically designed to be placed into flooring for an **unobtrusive heating solution** that keeps building occupants warm without taking up extra space.

Key Features:

Minimize Disruption

Drop-in heaters operate quietly, so you can keep bedrooms, living rooms and offices warm without distracting fan noise.

Safe Operation

These drop-in heaters come equipped with standard overheat protection for longterm peace of mind. The unit shuts down if it gets too hot, preventing unsafe conditions.

Ready to Connect

Included push-on tabs allow the wiring terminals of this heater to connect with ease for rapid installation and easy maintenance, even for multiple heating units.

Durability by Design

The heavy duty steel grille features a baked enamel finish for extra protection from scuffs, scratches and environmental corrosion.

SMARTSERIES® PLUS

Digital Touchscreen Control

THERMOSTATS & CONTROLS

SmartSeries Plus is the first digital touchscreen control capable of running a **fully programmable internal schedule** as well as having the capability to **connect to a BACnet Building Management System**.

Key Features:

Intelligent Controls for Intelligent Buildings

This control comes ready to connect to your Building Management System using BACnet MS/TP protocol.

Reduced Operations & Maintenance Time

BMS saves facility manager time and personnel cost by eliminating the need to travel to the heater site and inspect and diagnose root cause.

Control at your Fingertips

Without a BMS you can still get heat when and where you need it by using the built in 7 day programmable scheduling feature. With the Occupancy Settings, you can quickly schedule different temperatures for multiple periods per day.

Lockable Key Pad

Protects the unit from unauthorized access and/or tampering giving you peace of mind the heater is running correctly.

Temperature Override

Control your comfort even further by allowing users to set a temperature above programmed setpoints for up to 4 hours in an unoccupied state.

Scan the QR code to access additional specs and features.

1 Electronic thermostats have amperage minimums and each model has different voltage requirements, please check catalog thermostat specifications.

4 Series models require the removal of the internal thermostat from unit. Wire wall thermostat for proper fan operation. See model selection for specific thermostats.

5 Low voltage thermostats operate in conjunction with low voltage control systems using relays. Compatible with all standard 24V two wire thermostats.

6 The QTS watt units can use either single-pole or double-pole thermostats. The 1500 watt units must use a double-pole thermostat. (three conductors from thermostat to unit). Does not apply to low voltage thermostats, which need a transformer.

7 CDF and EFF Series models require different thermostats based on internal wiring. Wire wall thermostat for proper fan operation. See model selection for specific thermostats. Can not use digital thermostats with this unit.

8 Due to the complexity of wiring variations for remote wall thermostats with these products, we recommend that you contact Technical Services for assistance.

Temp. Range (°F)	45°F to 75°F	50°F to 80°F
Differential	Accuracy: Within 3°F of setpoint	Accuracy: Within 3°F of setpoint
Features	One thermostat controls two separate heating circuits and reduces input during light load periods. Second stage activates when temperature drops to approx. 1-1/2°F below the first stage turn-ON temperature.	Simultaneous control of two heating loads. Used where the total load slightly exceeds capacity of a single switch, where two thermostats are impractical. Both switches are calibrated to operate at approx. the same temperature.

Optional Accessories - Electronic / Control Options:

Table with 4 columns: CATALOG NO., UPC, DESCRIPTION, SHIP WT. Rows include CDFT, CDF24R, CDFR12, CDFDS_R, CDFDS_S, CDFTR4, CDFTR7.

Optional Accessories - Mounting Options:

Table with 4 columns: CATALOG NO., UPC, DESCRIPTION, SHIP WT. Rows include CDFSE, CDFRE, CDFSENW, CDFRENW, CDFTK, CDFRFK.

NOTE: Factory-wired for highest wattage, field-convertible to lower wattages. Factory-wired 1-PH, field convertible to 3-PH dual-phase units, maximum amp draw is listed. Amperage shown is for single phase. For factory installation of above controls, additional charges apply.
*Optional Power Relays or Integral Thermostats cannot be used when the Transformer Relay Option is chosen
For easy BMS integration, heater, relay, and SmartSeries Plus are needed

Adjustable Airflow Options:

Wide Pattern

(24x8 ft. coverage) In standard ceiling applications (8-10 ft.), heater disperses the air to give a gentle, less pronounced pattern while circulating all the air from floor to ceiling.

Narrow Pattern

(8x8 ft. coverage) For high ceiling applications (11-14 ft.), fan concentrates the heated air to ensure full penetration to the floor level.

Asymmetrical Pattern

(17x10 ft. coverage) Heated air is directed in a specific direction, allowing the heater to be located where space allows, with the heated air delivered to where it is required.

SmartSeries® Plus offers the ability to connect to a Building Management System using BACnet MS/TP. This means that once the product is mounted out of reach it can easily be controlled to meet your building needs.

Using a Building Management System allows you to monitor and control those units that are out-of-sight and out-of-mind. This saves time and money with no need to walk to each unit and verify they are running at the correct time.

HUHAA SERIES

Made-to-Order Unit Heater

UNIT HEATERS
MARLEY CUSTOM CAPABILITIES

This **rugged** unit heater works well in industrial settings. Its **powerful output capacity** even makes it suitable for heating your loading dock or other indoor/outdoor transition spaces.

Dimensions and Clearances:

CATALOG NO.	HEIGHT	WIDTH	DEPTH
HUHAA03 & 05	16"	14"	7 1/2"
HUHAA07 & 10	21 3/4"	19"	7 1/2"
HUHAA15 & 20	21 3/4"	19"	12 3/4"
HUHAA25 & 30	30"	26 5/8"	11 3/4"
HUHAA40 & 50	30"	26 5/8"	17 1/8"

Key Features:

Advanced Airflow

This unit heater's pull-through design draws air in across the heating element, so it runs cooler while providing an even blanket of comfort across its output range.

Safe Operation

A linear thermal cutout provides automatic protection the entire length of the heating element. Plus, most models feature a 24V control transformer for safer temperature adjustments.

Precise Positioning

The heater is equipped with individually adjustable louvers that aim your warmth where you need it most. A venturi outlet delivers the additional airflow you need to mount the unit vertically.

Three Times the Metal

The steel sheath heating element is clad in copper and outfitted with aluminum fins. This sophisticated design helps the heater run more safely and cool down faster.

Everything You Need for Installation

This unit heater doesn't require any piping flues, valves or traps. It's self-contained and ready to install wherever you need extra warmth.

Technical Specifications:

Temp Range: 40°-90°F
CFM: 350-3000

Ideal Spaces:

- Factories
- Warehouses
- Garages
- Stairwells
- Shipping Docks
- Power Stations
- Mechanical Rooms

SKU Legend: ◆ = Popular Products ● = Extended Offering (Contact your local Marley Sales Representative for typically associated lead times)

†1-3" phase denotes field convertible to 3-Phase

NOTE: All standard units are supplied with a low voltage control transformer and contactor (24V). Reference the appropriate Bundled Accessory table below for the standard accessories available out of the box with each PRO and PRO+ model.

HUHAA SERIES
Made-to-Order Unit Heater
Optional Field Installed and Factory
Installed Accessories

UNIT HEATERS
MARLEY CUSTOM CAPABILITIES

Table with 3 columns: Dimension, 3-20 kW, 25-50 kW. Rows include A, B, C, D, E, L, M, N with corresponding measurements.

Optional Factory-Installed Controls & Accessories:

Table with 2 columns: DESCRIPTION, Details of factory-installed controls and accessories like MUH03, MUH07, etc.

NOTE: Any factory-installed options require added surcharge. See price book for charges or contact factory.

Optional Field-Installed Electrical Controls:

Table with 4 columns: CATALOG NO., UPC, DESCRIPTION, ELECTRICAL RATING. Lists various electrical control options like UHMT1, MCFS, MRFS, etc.

NOTE: Any field installed options assembled in the factory require added surcharge. See price book for charges. MPDS60 disconnect switch is not suitable for field installation on 7.5kw and 10kw unit heaters.

Optional Mounting Brackets:

Table with 5 columns: CATALOG NO., UPC, COMPATIBILITY, SHIP WT., and a category column (Standard, Ceiling, Vertical Ceiling, Remote Tstats) listing various mounting bracket options.

MOUNTING LIMITATIONS: Unit heaters should not be used in potentially explosive atmospheres. The finish is not intended for direct salt spray exposure in marine applications...

Optional Dust Shields:

Table with 4 columns: CATALOG NO., UPC, COMPATIBILITY, SHIP WT. Lists dust shield options like JRDS8, JRDS14, JRDS19.

Diffusers for Vertical Mounting:

No Diffuser: No diffuser needed where a straight downflow air pattern is required. For maximum air throw, remove louvers.

Louver Diffuser:

Permits directional (straight line) air flow as in air curtain application over doorways. Rectangular coverage, Louvers can be turned in either direction.

NOTE: Visit website or contact your local representative for additional details

Diffuser Selector Table:

Table with 4 columns: CATALOG NO., UPC, COMPATIBILITY, SHIP WT. Lists diffuser options like HUHAALDL, HUHAALDM, HUHAALDS.

SKU Legend: ◆ = Popular Products ● = Extended Offering (Contact your local Marley Sales Representative for typically associated lead times)

†1-3" phase denotes field convertible to 3-Phase

NOTE: All standard units are supplied with a low voltage control transformer and contactor (24V). Reference the appropriate Bundled Accessory table below for the standard accessories available out of the box with each PRO and PRO+ model. Shipping weight includes mounting bracket

On dual-voltage units CFM, FPM, & RPM ratings are listed at higher voltage operation. On dual-phase units maximum amp draw is listed for respective voltage.

HHUHAA-Pro Bundled Accessories:

ACCESSORY	DESCRIPTION
24VAC Transformer	Takes incoming line voltage and drops it to low voltage (24VAC) to be used with low voltage thermostats.
Disconnect Switch	A three pole non-fused disconnect switch disconnects power to the heater. Design prevents entry into the control compartment until disconnect switch is turned to the OFF position.
Built-In Single Stage Thermostat	Built-in single stage thermostat with adjustable knob to have heater run until demand is satisfied.

HUHAA-Pro+ Bundled Accessories:

ACCESSORY	DESCRIPTION
24VAC Transformer	Takes incoming line voltage and drops it to low voltage (24VAC) to be used with low voltage thermostats.
Disconnect Switch	A three pole non-fused disconnect switch disconnects power to the heater. Design prevents entry into the control compartment until disconnect switch is turned to the OFF position.
SmartSeries® Plus thermostat	Remote Mount two stage thermostat runs 2/3 elements on stage 1 and full heat for stage 2. Fan cycles on high speed only. Comes with BACnet BMS compatibility, scheduling, cooling mode (Fan-Only), and keypad lock.
B10 mounting bracket	Used to easily mount the unit heater to the wall

COMFORT WITHOUT COMPROMISE

The contemporary aesthetics of this versatile Cabinet Unit Heater complement modern and future architect specifications. With multiple control options, comfort settings are easily monitored and controlled.

Want the most-common features without the added time of configuration?

on page 59

EASY INSTALL AND MAINTENANCE

- Hinged front panel enables one-person maintenance on ceiling applications
- Front cover interlock de-energizes unit when front cover is removed
- Disposable air filter mounted in inlet air stream

ROBUST DESIGN

- Heavy 16-gauge cold-rolled steel finished with a polyester powder coating provide strength and corrosion resistance
- Motors mounted with automatic thermal overload protection
- Two thermal safety cutouts automatically shut off and protect the heater in the event of overheating

CONTEMPORARY AESTHETICS

- Standard stamped grille with optional ducted grilles

OPEN COIL ELECTRIC

Duct Heater

UNIT HEATERS
MARLEY CUSTOM CAPABILITIES

This heater is the epitome of out-of-sight out-of-mind comfort giving you a **boost of heat for any duct system**. The two models give you the flexibility to install in both **rectangular or round ducts** and the flip-able design allows it to be installed anywhere.

Key Features:

Flexible Design

Flip-Able design and wide range of available sizes and voltages offers complete flexibility when specifying a job.

Longer Lifetime and Less Nuisance Tripping

Elements come standard with a watt density of 30 kW/sqft and offered Derated Heating Coils improve heater element life and nuisance tripping.

Convenient Quoting

New easy to use online configurator saves time and money while getting you the exact product you need for your application.

Hidden Heat

UL and ETL approved for incorporation into the duct work so no new holes in the wall or ceiling and no bulky product visible in room.

Ideal Spaces:

Office Buildings
Retail Stores
Warehouses
Schools
Hotels
Hospitals

Stainless Steel

PRODUCT!**

OPEN COIL ELECTRIC
Duct Heater

How to Order an Open Coil Electric Duct Heater

In almost every application, a duct heater needs to be highly configured and specialized to meet the demand of the space it is going in. To do this efficiently, we have created a new configuration process making it fast and easy to get the product you need. This page is designed to show you all the standard options available and how to decipher the part number to configure the specific heater you are ordering. (If there is a size larger or additional options needed, you will have to go through the Non-Standard Process for a quote.)

Open Coil Duct Heater Smart Part Number

Table with 11 columns: Brand, Mounting, Element Style, Revision, kW, Supply Voltage/Phase, Insulation Thickness, Stages, Control Voltage, Width*, Height*. It details the configuration options for different heater models like Berko and QMark.

*For Round Duct Heaters diameters are 06 = 6 inch, 08 = 8 inch, and 010 = 10 inch

Control Options (11 plcs)

Table with 5 columns: Heater Controls, Time Delay, Airflow Switch, Power Fusing, Disconnect Switch. It lists various control options and their corresponding part numbers.

Control Options (11 plcs) cont.

Table with 6 columns: Control Transformer, Thermostat, Coil, Derated, Pilot Light, Control Box. It continues the list of control options and their configurations.

Sample

Customer Order: Berko, Flanged, Open Coil, First Revision, 24 kW, 208V 3 PH, 1", 1 Stage, 24V, 20" Width, 14" Height, SCR Heater Controls, No Time Delay, Non-Adjustable Airflow Switch, No Power Fusing, Disconnect Switch, Control Transformer & Primary Fusing, Thermostat, Wall Mount, No Coil, Pilot Light, Derate to 35 Watts, Heater Power On, No Control Box.

Table showing the sample part number breakdown: B, F, C, A, 024, 3, 10, 01, 1, 020, 014, A, 0, A, 0, A, B, A, 0, A, A, 0.

Notes: 1. Please see the installation instructions for installation details and restrictions. 2. For slip in heaters being installed into an internally insulated duct, decrease the height by 2 times the insulation thickness, decrease the width by the insulation thickness, and add a recess equal to the insulation thickness. 3. All heaters will require either a fan relay or an airflow switch per UL requirements. If neither is chosen, a fan relay will be specified. If both a fan relay and airflow switch are required, both must be specified as options/accessories. 4. Power fusing is standard on all heaters above 48.0 amps. Power fusing must be specified as an option/accessory if required for heaters rated 48 amps or less.

Perimeter heat that promotes your vision

CONVECTORS
MARLEY CUSTOM CAPABILITIES

Convection heaters warm air at the base of exterior windows, creating a natural updraft that protects your building's heat envelope and curtain walls. Windows stay free of fog and condensation and warm air circulates throughout the space with no need for a fan or blower.

INCREASED OUTPUT, CONTROL OPTIONS, AND CUSTOM CAPABILITIES

BDBSL

ASLC

ASL3

ASL5

Did You Know?

We have a full complementing line of steel convectors available for applications that require a different construction, aesthetic, or layout.

Convectors create an **effective draft barrier** to minimize perimeter heat loss and prevent condensation against glazing, as well as add heat to offices, schools, lobbies or any space with large window spans or cold spots.

Quiet, Natural Airflow. Convectors do not require a fan or ducting, so they don't circulate dust and other allergens. They provide safe, easy-to-maintain source of heat with no moving parts.

Custom convectors are premium supplemental heat solutions that **won't compromise your buildings aesthetics.** These units can be ordered with any length, corner or trim option you need and are designed to your exact specifications for a fully integrated comfort solution.

Control Options. Add anything from a single-unit, built-in thermostat to a fully BMS-compatible silicon controlled rectifier to best command your building's heating system.

Introducing the THX
The out-of-sight,
out-of-mind UL listed
in-floor perimeter heater

THX

* Customizations not available for all products.

WHERE DESIGN AND COMFORT MEET

THX zero vertical profile eliminates visual disruptions while preserving the building's heat envelope and amplifying building aesthetics. Maximize building comfort and reclaim floor space with the most compact, in-floor convector on the market today.

Brought to you by Marley Engineered Products—a trusted leader in comfort solutions—THX is designed with durability in mind to withstand daily cleaning, water and debris.

The THX logo is a circular emblem with the letters 'THX' in a bold, white, sans-serif font. The background of the circle is a light gray, and the letters are centered within it. The logo is positioned in the lower right quadrant of the page, overlapping the floor and the text area.

THE OUT-OF-SIGHT,
OUT-OF-MIND
UL LISTED **IN-FLOOR**
PERIMETER HEATER

THX™ SERIES

UL Listed In-Floor Perimeter Convection Heater

CONVECTORS
MARLEY CUSTOM CAPABILITIES

Where design and comfort meet. Maximize building comfort and reclaim floor space with THX. Its zero vertical profile **eliminates visual disruptions** while preserving the building's heat envelope and amplifying building aesthetics. From design to installation and servicing, the THX is built to be quickly and **easily installed and maintained** in order to provide the superior comfort solutions your client demands.

Key Features:

Easy extensibility

THX units come in 2- to 5-foot modular lengths for easy one-person handling and wiring when adding multiple units.

Easy Mounting

Listed for concrete pour, mounting with legs or using a frame. Included leveling legs raise the unit to the appropriate height for flush installations and optional mounting legs provide an additional securing point.

Rated for High Traffic Areas

THX units can support double the UL weight test rating — durable enough to stand up to foot traffic in busy spaces. These units are placed in the floor where they won't show dents and scratches as easily as other heaters

Easy Installation and Maintenance

All units are factory wired and preassembled for out-of-the-box readiness. drop-in installation, and easy access for cleaning and maintenance, with one service professional.

UL Listed Out-of-the-Box with Sealed J-Boxes

Avoid the time and expense of certifying on site. THX is designed with water and debris management in mind. It features a sealed junction box and raised connection points, plus a wire screen beneath the grille catches debris to prevent it from entering the unit.

Ideal Spaces:

Conference Rooms
Hallways
Lobbies
Offices
Retail Spaces
Floor-to-Ceiling Curtain Walls

SKU Legend: ■ = Made to Order (Contact your local Marley Sales Representative for typically associated lead times)
For all sizes above 5', the units can be modularized together. Reference instruction manual for additional detail. For additional output contact Marley's Technical Services.

Optional Built-In Controls:

SUFFIX*	OPTIONAL BUILT-IN CONTROL	USE CASE(S)	RATINGS & DESCRIPTION
DS	Power On/Off Switch	Ideal for servicing	Double-pole, rated 20 amp @ 120-277 VAC. (See Note A) For three-phase heaters and single-phase heaters over 20 amps specify two.
TR	Transformer "Relay"	Ideal for remote, low voltage thermostats	Single-pole, low voltage relay with built-in transformer (24 VAC control), rated 22 amps @ 120-240 VAC and 22 amps @ 277 VAC. (See note E) 17 amps @ 347V. Not available on three-phase heaters.
PR	Power Relay	Ideal for multiple heater connections or BMS / EMS connections	Single-pole thermal time delay relay, rated 25 amps @ 120-600 VAC. (See Notes E & F). Specify control voltage.

* Addition To Basic Catalog No. (See Note D) NOTE: Reference the submittal sheet or additional detail

THX warms air at the base of exterior windows, creating a natural updraft that protects your building's heat envelope and curtain walls.

Architectural Sill-Height Convectors

CONVECTORS
MARLEY CUSTOM CAPABILITIES

Complement your architectural vision with these sill-height, extruded aluminum convectors. **Designed for simple installation, flexible output and control options, and easy customization**, these architectural convectors are the perfect choice to add heat and draft barrier protection to atriums, lobbies and other areas with floor-to-ceiling glass.

Key Features:

Ultimate Design Flexibility

The two available sizes provide ultimate flexibility and configurations to meet any requirements a space could need: from output, controllability, and aesthetics.

2-Piece Extruded Aluminum Construction

For rapid installation and easy maintenance, these extruded 12-gauge aluminum convectors feature a simple, two-piece design. The “Snap-Lock” closure allows you to easily secure the two pieces with no need for other fasteners.

Optional Built-In Controls:

SUFFIX*	OPTIONAL BUILT-IN CONTROL	RATINGS & DESCRIPTION
T	Single-Pole Thermostat	Rated 25 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range; adjustable through outlet grille-tamper-resistant. (See Note B) Not available on three-phase heaters.
2T	Double-Pole Thermostat	Rated 25 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range; adjustable through outlet grille-tamper-resistant. (See Note B for amperage restrictions.)
DS	Power On/Off Switch	Double-pole, rated 20 amp @ 120-277 VAC. (See Note A) For three-phase heaters and single-phase heaters over 20 amps specify two.
TR	Transformer Relay	Single-pole, low voltage relay with built-in transformer (24 VAC control), rated 22 amps @ 120-240 VAC and 22 amps @ 277 VAC. (See note E) 17 amps @ 347V. Not available on three-phase heaters.
PR	Power Relay	Single-pole thermal time delay relay, rated 25 amps @ 120-600 VAC. (See Notes E & F). Specify control voltage.
2ST	2-Stage Thermostat	Rated 24 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range, adjustable through outlet grille-tamper-resistant. Available on 2- or 3-element, single-phase heaters only.
PDT	Single-Pole Thermostat	Same as -T except Pilot Duty. (See Note C)
2TPD	Double-Pole Thermostat	Same as -2T except Pilot Duty. (See Note C & D)
M	Outlet Mesh	Price per foot

NOTE: *Addition To Basic Catalog No. (See Note D)

A. For single-phase loads over 20A and all three-phase loads, specify (2) power on/off switches. **B.** This control option is not available on single-phase heaters over 25 amps (22 amps on 277 VAC). In combination with the power on/off switch option use the 2ST thermostat option on heaters over 20 amps. **C.** A second transformer relay can be sequenced off the first transformer relay in the same heater. Up to 30 power relays in different heaters can be controlled by (1) single-stage pilot duty thermostat. **D.** Up to 30 power relays in different heater can be controlled by each stage of a two-stage pilot duty thermostat. **E.** Two relays are required on single-phase heaters over 20 amps with a power on/off switch, over 25 amps without a power on/off and on all three-phase heaters. Two relays are available for two-stage on two- or three-element heaters only. **F.** Three power relays are available for three-stage on three-element heaters only. Reference Marley Catalog and Submittals for additional control option details.

ASLC SERIES

Slimline Aluminum Convector

CONVECTORS
MARLEY CUSTOM CAPABILITIES

Bottom inlet unit is only 2 ¾ in. wide by 6 in. tall. Can be mounted to wall (3 in. above floor) or in front of window mounted on pedestals.

Front inlet unit is only 2 ¾ in. wide by 6 in. tall. Can be mounted to wall or directly to floor.

Hollow pedestals are 3 in. tall and allow concealed wiring access when stubbed through concrete floors.

Slimline 12-gauge aluminum convectors provide warmth and draft protection with a design that sits **closer to the wall** for a less obtrusive solution that still provides **expansive airflow**. These units feature multiple heating configurations and other accessories, so you can tailor your output, aesthetics and controls to fit your needs.

Key Features:

Higher Heat Output

Slimline design fits a taller housing into a compact footprint for enhanced output that's useful for draft protection, supplemental or primary heating.

Multiple Configurations

Customize your convector to match the specific heating needs and dimensions of the surrounding environment, including continuous, mullion-to-mullion design that makes your heating system virtually invisible. Flexible heat output levels are available, and you can order the length, voltage and color you need to fit your room exactly.

Accessory Options

Blend your convector into your building's design to provide a symmetrical heating layout. Blank sections, fillers, corners and caps can be added to your convector for a more finished look that suits your room. With cutting up to 1/32 of an inch and mitered corners of up to 43°, Marley can provide wall-to-wall convectors based on your blueprints or even just a concept sketch.

Custom Colors

No need to repaint on-site. Provide your own sample color chip or select from a palette of standard and custom color options.

Optional Built-In Controls:

SUFFIX*	OPTIONAL BUILT-IN CONTROLS	USE CASE(S)	RATINGS & DESCRIPTIONS
T	Single-Pole Thermostat	Ideal for 120v and 277v heaters	Rated 25 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages) 60-120°F temperature range adjustable through outlet grille-tamper-resistant. (See Note B)
2T	Double-Pole Thermostat	Ideal for 208v and 240v heaters	Rated 25 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range adjustable through outlet grille-tamper-resistant. (See Note B for amperage restrictions)
DS	Power On/Off Switch	Ideal for servicing	Double-pole, rated 20 amp @ 120-277 VAC. (See Note A.) For heaters over 20 amps specify two
TR**	Transformer Relay	Ideal for remote, low voltage thermostats	Single-pole, low voltage relay with built-in transformer (24 VAC control), rated 22 amps @ 120-240 VAC and 22 amps @ 277 VAC. (See Note E and F) 17 amps @ 347V. Not available for three-phase heaters
PR	Power Relay	Ideal for multiple heater connections or BMS / EMS connections	Single-pole magnetic relay, rated 25 amps @ 120-600 VAC. (See Note E). Specify control voltage
PDT	Single-Pole Thermostat	For sequencing low voltage connections with a transformer relay	Same as -T except Pilot Duty. (See Note C)
R**	Receptacle	For additional electrical connections.	For built-in or as installed in a control section

* Addition To Basic Catalog No.
** Will add 4 in. to length of heater

Notes: (A) For single-phase loads over 20A, specify (2) power on/off switches. (B) This control option is not available on single-phase heaters over 25 amps (22 amps on 277 VAC). In combination with the power on/off switch option use the 2T thermostat option on heaters over 20 amps. (C) Requires PR or TR. (D) Up to 30 power relays in different heaters can be controlled by each stage of a two-stage pilot duty thermostat. (E) Two relays are required on single-phase heaters over 20 amps with a disconnect switch, over 25 amps without a disconnect switch. (F) For ASLC Series the TR (transformer relay) R (Duplex Receptacle) will be installed in separate 4 in. long internal control boxes.

BDBSL SERIES

Draft Barrier Convectors

CONVECTORS
MARLEY CUSTOM CAPABILITIES

Bottom inlet unit is only 2 5/8 in. wide by 4 in. tall. Can be mounted to wall (2 in. above floor) or in front of window mounted on pedestals.

Hollow pedestals are 3 in. tall and allow concealed wiring access when stubbed through concrete floors.

Keep your windows **free from condensation and drafts** with reliable aluminum draft barrier convectors. Their **low-profile design** provides an **unobtrusive heating solution** that can be seamlessly added to any wall space. With multiple configurations and accessory options, you're sure to get just what you need.

Key Features:

Multiple Configurations

Customize your convector to match the specific heating needs and dimensions of the surrounding environment, including continuous, mullion-to-mullion design that makes your heating system virtually invisible. Flexible heat output levels are available, and you can order the length, voltage and color you need to fit your room exactly.

Accessory Options

Blend your convector into your building's design to provide a symmetrical heating layout. Blank sections, fillers, corners and caps can be added to your convector for a more finished look that suits your room. With cutting up to 1/32 of an inch and mitered corners of up to 43°, Marley can provide wall-to-wall convectors based on your blueprints or even just a concept sketch

2-Piece Extruded Aluminum Construction

For rapid installation and easy maintenance, these extruded 12-gauge aluminum convectors feature a simple, two-piece design. The "Snap-Lock" closure allows you to easily secure the two pieces with no need for other fasteners.

Easy Service/Installation

Make routine maintenance faster and easier with a draft barrier convector. It is pre-wired for entry on the right or left, with identical junction boxes on both ends. The power supply can be connected from the bottom, the rear or either end for easy wiring of multiple units from one point

*Add suffix -P for painted followed by the appropriate color code (i.e. W for white, B for black, etc.), -C for clear anodized
**One pedestal. Two pedestals required on units up to 10 ft. and three required on units over 10 ft.
***All Stand-off Brackets come standard as Beige.

Optional Built-In Controls:

SUFFIX*	OPTIONAL BUILT-IN CONTROLS	USE CASE(S)	RATINGS & DESCRIPTIONS
T	Single-Pole Thermostat	Ideal for localized control	Rated 24 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range; adjustable through outlet grille-tamper-resistant. (See Note B) Not available on three-phase heaters.
DS	Power On/Off Switch	Ideal for servicing	Double-pole, rated 20 amp @ 120-277 VAC. (See Note A) For three-phase heaters and single-phase heaters over 20 amps specify two.
PR	Power Relay	Ideal for multiple heater connections or BMS / EMS connections	Single-pole magnetic relay, rated 18 amps @ 120-600 VAC. (See Note C) Specify control voltage. Rated 24 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA — all voltages (See Note C & D)

* Addition To Basic Catalog No. (See Note D)
NOTE: A. For single-phase loads over 20A and all three-phase loads, specify (2) power on/off switches. B. This control option is not available on single-phase heaters over 24 amps (22 amps on 277 VAC). C. Specify holding coil voltage where applicable. D. Add 4 in. to the cabinet length.

CPL SERIES

Decorative Pedestal Steel Convector

CONVECTORS

MARLEY CUSTOM CAPABILITIES

For hallways, terminals and conference spaces, steel commercial convectors provide a **reliable draft barrier** and heating solution. Available with a full length decorative grille, this pedestal-mounted heater features **multiple lengths and output levels** to best address your heating needs.

Key Features:

Multiple Configurations

Configure your convector to match the specific heating needs and dimensions of your space. Select your heat output level with either single or up to three stacked heat elements. Order the length, voltage and color you need to fit your room exactly.

Higher Heat Output

Increase your heating capacity for cold spots or isolated areas. Up to 3 stacked heating elements expand your output to provide quiet, reliable heat for larger commercial spaces.

Accessory Options

Blend your convector into your building’s design to provide a cohesive solution. Blank sections, fillers, corners and caps can be added to your convector for a more finished look that suits your space.

Built-In Control Options

Get the accurate controls you need, pre-installed. You can order anything from a simple on/off switch to a thermostat, transformer or power relay.

Custom Colors

No need to repaint on-site. Provide your own sample color chip or select from a palette of standard and custom color options.

Scan the QR code to access additional specs and features.

CSL SERIES

Decorative Sill-Height Steel Convector

CONVECTORS
MARLEY CUSTOM CAPABILITIES

Add a **designer touch** to retail spaces, offices and lobbies with a decorative steel convector. Featuring the same heating levels and available options as the standard commercial steel convector, this model also offers a **full-length louvered grille design** that creates a striking accent wherever it's installed.

Key Features:

Decorative Grille

Create a more seamless sight line with decorative steel convectors. Their uninterrupted full-length louvers provide a designer accent to complement your room design.

Multiple Configurations

Configure your convector to match the specific heating needs and dimensions of your space. Select your heat output level with either single or up to three stacked heat elements. Order the length, voltage and color you need to fit your room exactly.

Higher Heat Output

Increase your heating capacity for cold spots or isolated areas. Up to three stacked heating elements expand your output to provide quiet, reliable heat for larger spaces

Accessory Options

UCJ SERIES

Institutional Electric Convector

CONVECTORS
MARLEY CUSTOM CAPABILITIES

When you need a durable, reliable heating solution with a **low surface temperature**, choose an institutional convector. It's perfect for **high-traffic areas** like hallways, classrooms, libraries and municipal buildings.

Key Features:

Durable Design

Keep hallways and public areas cozy without worrying about your heater getting dented or damaged. This convector is built to endure high-traffic areas with its high-gauge steel cabinet and epoxy-painted coating.

Tamper-Resistant

Keep live voltage away from passersby. The internally secured control box keeps the power supply and wiring for the unit safe from unauthorized access.

Keep Your Intakes Clear

For unrestricted airflow at all times, choose institutional convectors. The top of the unit is sloped at a 45° angle to keep people or objects from accidentally covering the vents.

Cooler to the Touch

Heat the room, not the heater itself. A taller housing allows this unit to operate at a lower surface temperature, so it's cooler to the touch. This allows for safer heating in any room.

Open Airflow

Enjoy efficient, worry-free heating, thanks to this unit's perforated steel front. This design maximizes airflow while providing a lower surface temperature that's safer to the touch.

Technical Specifications:

Construction: 12 gauge Steel

DPST Thermostat Range:

55°-100° F

A rugged comfort solution for offices, lobbies or stairwells, this Commercial Slope-Top Convactor provides higher heat output with multiple configurations available. Its slope-top design **protects vital airflow** from obstructions, while its heavy-duty steel construction **resists dings and dents**. NEMA 4X models are available for **wet or corrosive environments** like food processing areas, breweries, wastewater treatment plants and swimming pools.

Key Features:

Multiple Configurations

Configure your convactor to match the specific heating needs and dimensions of your space. Select your heat output level, length, voltage and color. Stainless steel units are also available.

Higher Heat Options

Increase your heating capacity for cold spots or isolated areas. Anchored metal-sheath elements provide quiet, reliable heat with expanded output to warm larger commercial spaces

Accessory Options

Blend your convactor into your building's design to provide a cohesive solution. Blank sections, fillers and corners can be added to your convactor for a more finished look that suits your space

Built-In Control Options

Get the accurate controls you need, pre-installed. You can order anything from a simple on/off switch to a thermostat, transformer or power relay

High-Grade Construction Option

For safe, reliable heat in damp or corrosive environments, select a commercial slope-top convactor. Available in 16-gauge stainless steel with a NEMA 4X thermostat to protect wiring and controls.

Optional Built-in Controls:

SUFFIX	Optional Built-In Controls	USE CASE(S)	RATINGS & DESCRIPTION
T*	Single-Pole Thermostat	Ideal for 120v and 277v heaters	Rated 25 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range; adjustable through outlet grille-tamper-resistant
2T*	Double-Pole Thermostat	Ideal for 208v and 240v heaters	Rated 25 amps @ 120-240 VAC and 22 amps @ 277 VAC. Pilot duty rating of 125 VA (all voltages). 60-120°F temperature range; adjustable through outlet grille-tamper-resistant. (See Note 1 for amperage restrictions.)
DS*	Power On/Off Switch	Ideal for servicing	Double-pole, rated 20 amp @ 120-277 VAC
TR*	Transformer Relay	Ideal for remote, low voltage thermostats	Single-pole, low voltage relay with built-in transformer (24 VAC control). Rated 22 amps @ 120-240 VAC and 19 amps @ 277 VAC. 18 amps @ 347V . Not available on 3-phase heaters
PR*	Power Relay	Ideal for multiple heater connections or BMS / EMS connections	Single-pole magnetic relay, rated. (See Note 3) Specify control voltage. Rated 30 amps @ 120-240 VAC and 30 amps @ 277 VAC. Pilot duty rating of 125 VA — all voltages (See Note 3)

* Addition To Basic Catalog No.

NOTE: For 347V and 600V units options T, 2T, DS, are not available. Specify PDT as the suffix for a thermostat. *Factory built-in. Add suffix to heater catalog number. 1) A control combination is not available on heaters that have an amperage draw which exceeds the rated limit of the lowest rated control. 2) For non-standard controls or combinations, contact factory. 3) Specify holding coil voltage where applicable.

NEMA 4X NOTE: Optional built-in controls are not compatible with the NEMA 4X Series. Standard 50-day lead time for NEMA 4X models. Contact sales representative for more information on NEMA 4X models.

Optional Accessories:*

SUFFIX	Optional Built-In Controls	RATINGS & DESCRIPTION
ICSTIC	2	Inside corner (requires additional wall space — use with ICST model only)
ICSTOC	2	Outside corner (requires additional wall space — use with ICST model only)

Two types of control sections are available:

- Control sections are 28" long and available in 7" high and 14" high steel models, as well DBA and SHA aluminum models
- An SCR control section which may include one or combinations of Master and Slave SCR's with an SCR type thermostat, or a Control Transformer

To develop a complete catalog number, first start with the catalog number of the selected Blank Control Section. Then add slash marks to separate the catalog numbers that describe the individual controls desired. Also specify finish, heater voltage, phase 1 or 3, and control voltage. All control sections are fully custom, factory made-to-order per application and therefore, all mounting locations, incoming power locations etc, must be verified by MEP engineering.

Example:

CSH07BCS1/TR24/2CB3P30.

This example catalog number would be for a 7-inch Commercial Style Grille Steel Convectector control section with a 24v transformer relay, two 3-pole 30 amp Circuit Breakers.

Blank Control Section¹:

CATALOG NO.	DESCRIPTION	SIZE	INLET / OUTLET
ASL3BCSF	Aluminum Draft Barrier Style Control Section	3 5/8 x 6 x 28 in.	Front Inlet
ASL3BCSB		3 5/8 x 6 x 28 in.	Bottom Inlet
ASLSBCSF		5 3/8 x 7 x 28 in.	Front Inlet
ASLSCSB		5 3/8 x 7 x 28 in.	Bottom Inlet
CSLAMBCS1	Steel Commercial Style Control Section	7 in. High	Bottom Inlet/Top Outlet
CSLALBCS1		14 in. High	Bottom Inlet/Top Outlet
CSLAMBCS2		14 in. High	Bottom Inlet/Front Outlet
CSLALBCS2		7 in. High	Bottom Inlet/Top Outlet
DSH14BCS1	Steel Decorative Style Control Section	14 in. High	Bottom Inlet/Top Outlet
DSH07BCS2		7 in. High	Front Inlet/Top Outlet
DSH14BCS2		14 in. High	Front Inlet/Top Outlet

Control Transformer, 50 VA Rating:

CATALOG NO.	DESCRIPTION
TR24	240/208V Primary, 24V Secondary Step Down Transformer
TR27	277V Primary, 24V Secondary Step Down Transformer

Thermostat & Receptacle:

CATALOG NO.	DESCRIPTION
1PDT	Single-Pole Pilot Duty Thermostat, 60°-120°F Temperature Range-125 VA Rating
2PDT	Two-Stage Pilot Duty Thermostat, 60°-120°F Temperature Range-125 VA Rating. Available on 2- or 3-element, single-phase heaters only.
2ST	Two-Stage Thermostat 60-120°F temperature range, adjustable through outlet grille-tamper-resistant. Available on 2- or 3-element, single phase heaters only.
R	120V Receptacle Duplex receptacle, 120V/20A, mounting in left or right end cap of Steel Convectors only. For Alum. Convectors verify locations with factory.

Power On/Off Switch:

CATALOG NO.	DESCRIPTION
DS	Pilot Duty Power On/Off Switch; Double-Pole (Disconnects relay holding coil circuit)

Circuit Breakers²:

CATALOG NO.	DESCRIPTION	AMPERAGE	VOLTAGE
1CB2P30	(1) Three-Pole Circuit Breaker	30 Amps	208, 240, 277 VAC
1CB2P60	(1) Two-Pole Circuit Breaker	60 Amps	
1CB3P30	(1) Three-Pole Circuit Breaker	30 Amps	
1CB3P60	(1) Three-Pole Circuit Breaker	60 Amps	
2CB2P30	(2) Two-Pole Circuit Breaker	30 Amps	
2CB2P60	(2) Two-Pole Circuit Breaker	60 Amps	
2CB3P30	(2) Three-Pole Circuit Breaker	30 Amps	
2CB3P60	(2) Three-Pole Circuit Breaker	60 Amps	

SCR Controls² — Lead:

CATALOG NO.	DESCRIPTION
M90525A	Lead SCR Control Rated 25 Amps @120 - 480V AC. Lead units accept 0-10V DC, 4-20mA, or 135 OHM proportional control inputs. Each Lead SCR can provide low voltage signal to Follower SCR(s) ⁴
M90548A	Lead SCR Control Rated 48 Amps @120 - 480V AC
M90548A-2	3-phase Lead SCR Control Rated 48 Amps @120 - 480V AC

SCR Controls³ — Slave:

CATALOG NO.	DESCRIPTION
S90525A	SCR Slave unit controller. Rated 25 Amps.
S90548A	SCR Slave unit controller. Rated 48 Amps

SCR Thermostat⁴:

CATALOG NO.	DESCRIPTION
T90613V	Provides a proportional 2-10 VDC output for controlling 0-100% of the connected load to each Lead SCR 4.

NOTE: Each SCR incorporates its own zero-firing logic, providing any combination or connection arrangement for single or three phase applications. 25A single phase SCR can be mounted in the SHA aluminum convectector. Each Master and Thermostat will require 24V AC Transformer. Specify holding coil voltage where applicable. On all 5 in. high steel convectors the two-pole thermostat must go in the right hand junction box (TR must mount in RH junction box. 2T+TR are invalid in 5 in. high steel convectors).

(1) Blank control sections are subject to the same color selections and pricing as the appropriate matching heater.
(2) Not available in DBA control sections. (4) Maximum of 8 SCR's is the limit for one thermostat output signal.

When failure is NOT an option

HAZARDOUS
ENVIRONMENT
PRODUCTS
MARLEY CUSTOM CAPABILITIES

Harsh heaters are ideal for hazardous environments where the presence of flammable gases, vapor or dust exist.

BWD SERIES WASHDOWN UNIT HEATER

*Water Resistant Construction for
Easy Cleaning*

*NEMA 4 box to protect controls
Epoxy coating available for
corrosion resistance*

RUX SERIES EXPLOSION-PROOF UNIT HEATER

*Explosion proof for
heat-sensitive areas*

*High-temp limit devices to avoid
over temp situations
Motor is thermally protected
and permanently lubricated*

QX SERIES EXPLOSION-PROOF CONVECTOR

*Explosion proof for
heat-sensitive areas*

*High-temp limit devices to avoid
over temp situations
Low-maintenance construction
with no moving parts*

* Customizations not available for all products.

Washdown Corrosion-Resistant Unit Heater

HAZARDOUS
ENVIRONMENT
PRODUCTS
MARLEY CUSTOM CAPABILITIES

Crafted for **wet and corrosive environments**, this heater can withstand **direct spray down** with a hose all the way to the harsh environment of a **chemical plant**.

Key Features:

Brave the Elements

Comes with NEMA 4X junction box and epoxy coated enclosed ball bearing motor to protect against water and dust. Add in the additional epoxy coating for advanced corrosion resistance.

Designed with Comfort in Mind

316 Stainless Steel-finned elements for improved heat distribution so the heat reaches where you need it to be.

Fast and Easy Installation

14-gauge Stainless Steel wall/ceiling bracket provides multiple options for mounting and allows unit to swivel. 24VAC controls improve safety with low voltage remote thermostat.

Built to Last

This heater is built out of 16 gauge 304 stainless steel and comes with an automatic high temperature reset limit to protect against overtemp situations.

Technical Specifications:

Temp Range: 40°-120°F

CFM: 700-2400

Ideal Spaces:

Car Washes
Cement Plants
Coal Handling Areas
Dairies & Food Processing Plants
Marine & Offshore
Power Generating Stations
Steel Mills & Foundries
Swimming Pool Areas
Wastewater Treatment Plants

Stainless Steel

Explosion-Proof Unit Heater

HAZARDOUS
ENVIRONMENT
PRODUCTS
MARLEY CUSTOM CAPABILITIES

This heater was specifically designed to heat areas classified as hazardous locations and comes with a **thermally-protected motor** so you get heat fast and consistent while maintaining **top-of-the-line safety**.

Key Features:

Designed with Safety in Mind

Heater was designed to meet Class I, Groups C, and D, Division 1 and 2 or Class II, Groups E, F, and G, Division 1 and 2 and has a low operating temperature for atmospheres having an ignition temperature higher than 165°C (329°F)—code T3B

Innovative Design

Advanced heat exchanger design allows lower operating temperatures from liquid to air heat exchanger with steel tubes, aluminum fins, a non-toxic heat transfer fluid, and a pressure relief plug

Safety Comes Standard

Pre-wired, self-contained control center. Standard controls include automatic reset thermal limit, magnetic contactor, and 24V control circuit transformer with optional built-in thermostat, disconnect switch, pilot light, and manual reset

Built to Last

Powder-coated heavy-gauge steel cabinet surrounding 14-gauge heavy-duty steel frame supports internal components such as the permanently lubricated ball bearings and thermally protected explosion-proof motor

Technical Specifications:

Temp Range: 50°-120°F (10°-49°C)
CFM: 550-3850

Classes:

Class I, Divisions 1 and 2, Groups C & D
Class II, Divisions 1 and 2, Groups E, F & G
Class I, Zones 1 and 2, Group IIB

Ideal Spaces:

Aircraft Hangars/Service Areas
Chemical Storage/Handling Areas
Coal Preparation Plants
Compressor Stations
Grain Elevators
Petrochemical Plants
Oil Refineries & Rigs
Paint Storage Areas
Spray Booths

Explosion-Proof Unit Heater

HAZARDOUS
ENVIRONMENT
PRODUCTS
MARLEY CUSTOM CAPABILITIES

Factory Built-in Options:

	CATALOG NO.	OPTION	DESCRIPTION
●	D	Disconnect Switch	Factory installed on the unit heater above the control enclosure. This is an inexpensive and positive way to meet NEC/CEC requirements for a disconnecting means within sight of the heater.
●	K	"Warning" Pilot Light	Indicates when the thermal cutouts have tripped and the unit heater needs servicing. Not available with combination V & L.
●	L	"Heater On" Pilot Light	Indicates when the electric heating elements are energized. Not available with combination V & K
●	M	Manual Reset Thermal Cutout with Backup Contactor	A pilot duty manual reset thermal cutout with a backup contactor is provided for independent secondary overtemperature protection. Cannot be installed with S, S1 or V.
●	S	Auto/Fan Selector Switch	A two-position switch wired to the control circuit for auto (automatic heat) and fan only control. Cannot be installed with M, V or S1.
●	S1	Built-In Controls for Remote Auto/Fan Selector Switch	Unit is prewired for field addition of remote auto/fan selector switch. Cannot be installed with M, V or S.
●	T	Adjustable Thermostat	Factory installed and prewired to the control enclosure. Thermostat is adjustable from 50° to 90° F (10° to 32°C).
●	T1	Adjustable Thermostat for Wet Locations	Factory installed and prewired to the control enclosure. Thermostat is adjustable from 40° to 80° F (5° to 25°C). Can be specified for all constructions.
●	V	120 Volt Control Circuit	Can be provided when required for special external thermostat circuit. Cannot be installed with S, S1, M or the combination of both K & L together.

SKU Legend: ● = Popular Products ● = Extended Offering ■ = Made to Order (Contact your local Marley Sales Representative for typically associated lead times)
Note: Both pilot lights (K & L) are not available with 120V option (V). Only one pilot light can be ordered with 120V control heaters.

Standard Mounting Kits:

CATALOG NO.	DESCRIPTION
1022451	Ceiling Mounting Kit
1022454	Wall Mounting Kit
1022457	Pole Mounting Kit

Note: One kit required per heater. Work with all frame sizes

Accessory Remote Thermostats:

Explosion-Proof Convactor

HAZARDOUS
ENVIRONMENT
PRODUCTS
MARLEY CUSTOM CAPABILITIES

This heater was specifically designed to heat areas classified as hazardous locations and with **no moving parts** so you will have the peace of mind knowing this heater will keep your space warm while maintaining **top of the line safety**.

Key Features:

Designed with Safety in Mind

Heater was designed to meet Class I, Groups B, C, and D. Division 1 and 2 of Hazardous Environments and comes with a sloped top cabinet to prevent objects from restricting airflow.

Corrosion Resistant

Polyester powder-coating heavy-gauge steel provides excellent corrosion resistance.

High Grade Parts

High quality, long life tubular elements with high grade resistance wire embedded in MGO, centered in heavy gauge 1.25 in. diameter sheath with 3 x 3.25 in. fins and a sloped top.

Fast and Easy Installation

Explosion proof junction boxes and included wall mounting brackets make installation easy and quick.

Classes:

Class I, Divisions 1 & 2, Groups B, C & D

Class II, Divisions 1 & 2, Groups E, F & G

Class I, Zones 1 & 2, Groups IIB & H2

Ideal Spaces:

Battery Storage Areas

Chemical Plants

Coal Handling Facilities

Dry Cleaning Plants

Gasoline Fueling & Storage Areas

Grain Elevators

Oil Refineries

Paint Spraying & Storage Areas

Petrochemical Plants

PRODUCTS
MARLEY CUSTOM CAPABILITIES

Electrical Package Options:

All single-phase heaters rated over 22 amps or 277 volts and all three-phase heaters require a magnetic contactor. Some electrical combinations will also require a control transformer. To simplify field installation, these accessories are factory-mounted on the heater cabinet and factory pre-wired (not available on Size 1 convectors).

CATALOG NO.	OPTION	DESCRIPTION
B2	Electric Control Option* (without thermostat)	Classes I and II, Groups B, C, E, D, F and G includes contactor and transformer (as required). Required for all three-phase and singlephase heaters over 22 amps or 277 volts
B2S1	Thermostat & Controls*	Classes I and II, Groups C, D, E, F and G includes thermostat, contactor and transformer (as required).
B3	Thermostat & Controls (Group B)*	Classes I and II, Groups B, C, D, E, F and G includes thermostat, contactor and transformer (as required). Thermostat has internal set point.
S1	Thermostat Only*	Classes I and II, Groups C, D, E, F and G single-phase heaters rated up to 22 amps at 120-277 volts. Use remote room thermostat Catalog Number 1007002 for Size 1 convectors.
S2	Thermostat Only (Group B)*	Classes I and II, Groups B, C, D, E, F and G single-phase heaters rated up to 22 amps at 120-277 volts. Thermostat has internal set point. Use remote room thermostat Catalog Number 1024754 for Size 1 convectors.

*Not available on Size 1 Convectors.

Accessory Remote Thermostats:

CATALOG NO.	SWITCH TYPE	TYPE	RATING	TEMP RANGE	DESCRIPTION
1007002	Bimetal	SPDT	125-277V, 22A	50°-90°F (10°-32°C)	Class 1, Div. 1, Groups C & D Class II, Div. 1, Groups E, F, & G

S2 & B3, rated for
Class I, Groups B, C & D | Class II, Groups E, F, & G

A blanket of warmth for hard-to-heat areas

RADIANT HEATERS
MARLEY CUSTOM CAPABILITIES

Radiant technology works like the sun's rays to put warmth right where you need it — without having to heat (or pay for heating) the surrounding air.

Transit Station

Stadium

Loading Dock

Open-Air Dining

Entryway

Offices & Basements

Why Radiant Heating

SAVE ON ENERGY & MAINTENANCE COSTS

By transferring warmth directly, radiant heaters don't waste energy heating the surrounding air. With no filters or moving parts to maintain, they are less costly to service as well.

HEAT WHERE AND WHEN YOU NEED IT

As a direct heat source, radiant output is unaffected by wind and rain. Berko radiant heaters can be used for everything from snow removal to cozying up counter and desk areas.

CLEANER ALTERNATIVE TO GAS HEATING

Berko radiant heaters can be installed in tight spaces with little to no clearance. There's no need for ducting or exhaust, so these heaters operate cleanly without circulating dust or fumes.

Versatile, Superior Value Both Indoors and Outdoors

Instant & Targeted Heat: Infrared energy delivers direct, uniform and localized heat — heating people and objects rather than the air, just like the sun.

Clean & Safe Heat: No fumes, odors or combustion. Does not circulate dust or other irritants and allergens.

Energy Efficient: Optimized shortwave infrared energy delivers continuous comfort efficiently without energy waste due to the wind and heating of the surrounding air.

Easy to Install: No need for gas lines, ducting or venting. Install in compact spaces.

Low Maintenance: No filters or moving parts to service.

Money Savings: Minimal upfront costs due to material and labor. Minimal energy usage and no need to purchase propane or other fuels to maintain operation.

*Customizations not available for all products.

SKU Legend: ■ = Made to Order (Contact your local Marley Sales Representative for typically associated lead times)

HOW TO ORDER
The catalog number for custom panels begins with the QT prefix followed:
• Watt Density (H, M, L)
• Panel Width
• Panel Length
• Voltage (1=120V; 8=208V; 2=240V; 7=277V; 3=347V)
For example, a 13 x 36 in. 240V unit with a high watt density would be QTH13362.

When ordering, please specify panel size as exact or nominal (panels can be up to 3/4 in. less in size).
^ maximum panel length = 60 in.
^^ maximum panel length = 72 in.

Catalog No. for surface mounting frames (QSF) and recess mounting frames (QRF) begin with their respective prefix followed by width and length of panel.

Optional Mounting Accessories:

NOTE: Heating panels do not have a fire or hazardous rating, but construction is of fire retardant materials. Panels normally are treated like light fixtures. If necessary, acoustical tile can be placed on top of the panels.

Scan the QR code to access
additional specs and features.

Additional Made-to-Order Features

Tegular (revealed edge)

Tegular systems may utilize a standard grid with a 1⁵/₁₆ in. cross-T or a “fine line” grid with a ⁵/₁₆ in. cross-T. The acoustical tile is notched to hang below the grid creating the revealed edge. Tegular panels are built with a support angle on all four sides to allow the panel front to drop flush with the finished ceiling. Tegular and Fine line Tegular panels are supplied standard with universal mounting clips installed for support chain.

Silkscreen

Radiant heating panels can be silk screened to provide an architectural blend with leading acoustical tiles. For T-bar, concealed spline and Tegular ceiling systems.

Custom Colors

Radiant heating panels can be painted any color desired with high temperature acrylic paints without affecting panel performance. Radiant energy is emitted from heating panels in the 8-10 micron wavelength range. One of the principal characteristics of the wavelength is that it is not color selective as are shorter wavelengths. Consequently, the surface color of the panel is unimportant to heating efficiency and can be considered solely in the light of aesthetics.

Panel Fronts for Continuous Ceiling Line

To provide a continuous ceiling line around the perimeter of a building, the factory can provide panel fronts to be interspersed between the functioning heating panels.

Controls

Power Relay—factory prewired to heaters. 30 amps single-pole with 24V, 120V, 208/240V or 277V holding coil voltages.

Longer Flexible Conduit

Panels will replace the standard 48 in. greenfield with up to 11 ft. of ½ in. flexible conduit.

Stainless Steel Construction

Special stainless steel panels are available for chlorine storage areas. Panels will be equipped with seal tight connectors and silicone sealed. If orders call for stainless steel construction the panels will be painted unless specified different. Three different finishes available; mill, mirror and brushed.

Factory Silicone-Sealed Panels

Exterior moisture and condensation do not affect heating panel performance, but water inside the unit can cause the panel to fail. Panels being used in locker rooms and swimming pool areas should be totally sealed with silicone at the factory before shipment, if there is a chance of moisture above the ceiling, then seal tight conduit and seal tight connectors also should be used.

Seal-Tight Flexible Conduit & Connectors

Radiant ceiling panels come with ½ in. greenfield flexible conduit and straight connectors. Seal-tight connectors and conduit can be substituted at the factor if panels are to be used in high moisture areas or if required by local electrical codes.

Heavier Duty Panels

For special installation the factory can use heavier gauge steel in the construction of the panels.

Modular Wiring Systems

For specific jobs, the factor can substitute modular connector for the straight connectors and pig tails that are standard equipment.

Optional Made-To-Order Accessories:

CUSTOM PANEL OPTIONS	DESCRIPTION
Silkscreen	To Provide An Architectural Blend With Leading Ceiling Tile, 2x5 ft. Max. There is a Panel Charge Each Time. If Manufacturer Does Not Have A Tile Pattern Screen There Is An Additional One-Time Charge. See Pricebook.

Filler Panels	Finished To Match Standard, Silkscreen Or Custom Painted Panel. Does Not Contain An Element Or Flex Conduit. Standard Construction: Front Only. Tegular / Finline Tegular: Front And Back Only
Power Relay	24, 120, 208, 240, 277 VAC

NOTE: Custom products are made to order and non-returnable.

Infrared technology permits the heating of areas where it is impractical, either economically or physically, to heat air. The physics that causes warm air to rise and cool air to fall are constantly working against forced air heating systems, particularly in outdoor or high ceiling areas. The radiant heat energy emitted by infrared heaters is transferred direct to the people and objects under them. It is the same principle that allows the sun to make a clear, cold day feel warm. The radiant energy from infrared heaters can be directed and focused in any direction to evenly blanket people and equipment with comforting warmth, free from drafts and noisy fans or blowers.

Selecting the Right Models

Keep in mind these elements when selecting the correct infrared heater for your needs. Consult your MEP sales representative for additional design assistance.

- 1. Type of application: area heating, snow melting, or spot heating
- 2. Type of environment: outdoors, indoors, marine or corrosive atmospheres
- 3. Design area: square footage, objects/people standing or sitting
- 4. Watt density required to maintain comfort
- 5. Mounting height
- 6. Selecting Proper Heat Pattern

7. Selecting Proper Heating Elements

Metal Sheath High Traffic Areas	Quartz Tube Indoor/Outdoor Area/Spot Heating	Quartz Lamp High Bays, Snow Melting	Flat Panel Emitter Indoor/Outdoor Area/Invisible Heating

RESPONSE TIME, DESIGN TO SPEC, INTENSITY/OUTPUT, EFFICIENCY

- 8. Product Selection After determining the requirements above, visit the product portion of our catalog to select appropriately sized heaters for your application. Contact your sales representative for more information on which infrared heaters will work for your specific application.
- 9. Control Optimization For the optimal preforming solution, it is important to understand how the application space should be controlled. Marley offers a variety of control solutions for various types of application needs. Please consult your sales representative for more information on which control options are ideal for your specific application.

VRP/VRS SERIES

Commercial/Industrial Infrared Heater

RADIANT HEATERS
MARLEY CUSTOM CAPABILITIES

Product shown installed with optional trim kit. Enclosure Box not included.

For **indoor/outdoor heating**, choose these painted steel or stainless steel infrared heaters. When added to your workshop, warehouse, gym or pool, they provide excellent spot heating or total comfort that is **unaffected by outside drafts**.

Key Features:

The Right Heat for the Right Space

Dual and triple element models concentrate your heating capacity efficiently without the need to add more individual units. Optional trim kit accessory enables the heater to be used in spaces with overhangs without consequence of wind or inclement weather adversely affecting the installation of the heater or obscuring the surrounding views.

Flexible Design

Metal sheath, quartz tube and quartz lamp heating elements can all be used interchangeably with these infrared heaters, allowing for flexible operation even when environmental conditions change.

Aim Your Heat

The heavy duty gold-anodized reflectors in this unit allow you to focus your heating pattern in any one of several configurations.

Rugged and Reliable

This infrared heater's steel internal parts and high quality finish make it a reliable, easy to maintain choice for harsh industrial environments or where coastal salt air or other corrosive conditions are present.

Steel Strength

The 20-gauge galvanized steel enclosure and wiring compartment is finished with a statuary bronze powder coat for extra durability and a refined look.

Technical Specifications:

Element Types: Metal Sheath, Quartz Tube, Quartz Lamp

Reflection Angles: 30° Sym., 60° Sym., 60° Asym., 90° Sym.

Ideal Spaces:

Parking Garages
Arenas & Showrooms
Workshops & Gymnasiums
Loading Docks & Warehouses
Aircraft Hangers
Swimming Pools & Ski Resorts
Walkways & Entryways
Sports Arenas & Driving Ranges
Bus Stops & Smoking Areas

Metal Sheath: used indoors or outdoors in high-traffic areas; Quartz Tube and Quartz Lamp: used indoors and outdoors for snow melting and spot heating. Bronze finish is not intended for direct salt spray exposure in marine applications or highly corrosive greenhouse, swimming pool, chemical storage or industrial atmospheres. Maintain at least 5 ft. in radiant path, between bottom of heater and combustible material. Pigtail element leads for a more positive connection in high-traffic areas where physical abuse.

Clearances:

MOUNTING CLEARANCES

- 24 in. to vertical side walls
- 36 in. between heaters mounted side by side. Heaters may be mounted end to end.
- 6 in. to ceiling
- 84 in. to floor

Contactor Panel

SSR Panel

Key Features:

Wide Range of Configurations

Factory-wired for efficient installations to include terminal blocks, multi-position selector switches, 24V or 120V low voltage control circuit, and other project specific accessories. Three phase panels available with 30A or 60A contactors in 2, 5, 10 or 20 unit designs; supply voltage from 208-600V. Single phase panels available with 30A contactors in 2, 5, 10 or 20 unit designs; supply voltage from 120-600V.

Enclosure Options

Nema Type 1 and Type 3R enclosure available, cULus listed and labeled control panels.

Suitable for Low and Medium Cycle Controllers

Designed to take in a wide variety of inputs. As example: standard wall thermostats, smart thermostats, on/off, timers, rheostats, percentage timers, and custom touch screen operation.

Zone Control

Single and multi-zone control capability.

GFI Protection

GFI protection can be added to all 30A options for the 2, 5, and 10 circuits panels.

Customizations

Custom panels available to include BACnet support, BMS integration, touch screen control, safety disconnects, and anything else your project requires. Reach out to your local Marley sales representative for additional details.
