# ARCHITECT'S AND ENGINEER'S SPECIFICATIONS\*

The electric unit heater(s) shall be as manufactured by Berko®; A Marley Engineered Products® Brand, Bennettsville, SC. Heater(s) shall be fully UL approved, designed for either wall or ceiling mounting without modification and operate at either 208 or 240VAC and have field-adjustable capacity from 1.874 to 5kW. or 2.812 to 7.5kW.

**HOUSING:** The cabinet shall be of heavy gauge steel, welded and phosphatized; then completely painted beige by a baked enamel painting process. Front and back panels shall be removable to gain full access to element, motor and fan area. Fan guard shall be painted to match heater for appearance and durability. Heater(s) shall be furnished with attached ceiling mounting bracket and shall have capability of full horizontal and vertical positioning. Heater(s) shall be so designed as to permit mounting within two inches of the ceiling in full horizontal mode.

**CONTROL BOX:** The control box, housing all heater wiring and controls, shall be located at the bottom of the heater and equipped with a swing down hinged cover to permit full access for installation and servicing without dismounting the heater.

**WIRING:** All heater and control wiring connections shall terminate in the control box. Proper wiring diagram shall be attached to the inside of the control box cover. 60° C wire may be used to bring entry wiring into compartment.

**FAN MOTOR:** Fan motor shall be totally enclosed, impedance protected and of unit bearing design suitable for horizontal or vertical operation with high starting and running torques. Fan motor and controls shall operate directly from the line voltage.

**HEATING ELEMENT:** The heating element shall be warrantied for five years and shall be of non-glowing design consisting of a special resistance wire enclosed in the steel sheath to which steel plate fins are brazed. The heating element shall cover the entire air discharge area for uniform heating.

**THERMAL CUTOUT:** Thermal cutout shall be built into the system to automatically shut off heater in event of overheating and reactivate the heater when temperatures return to normal.

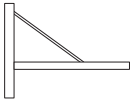

\*Berko reserves the right to change specifications without prior notice.

NOTE: Disconnect switch (DS30) option available for heaters 24 amps or lower. Units come factory wired to higher wattages. Additional wattages can be achieved with field rewiring per instruction manual.

## Controls and Accessories:

CATALOG NO.	DESCRIPTION
 DS30	3-pole power disconnect switch for field installation on all heaters. Complies with "positive off" requirements.
 CWB1A	Wall mounting brackets for all units. (Ceiling mounting bracket is included with all heaters.)

## Dimensions and Clearances:

No matter the industry or application, Marley Engineered Products has a robust portfolio of innovative, reliable, high-performance comfort heating and ventilation solutions for all your heating needs.
